Explanation and structure of data on the tobacco product by brand and type of product

Column	Column title	Explanation (E)
1	Name of Manufacturer or Importer	Name of the company manufacturing or importing the tobacco product.
2	Country	Member State where the tobacco product is marketed: Germany – DE Austria – AT Belgium – BE Bulgaria - BU Cyprus – CY Czech Republic – CZ Denmark – DK Estonia – EE Finland – FI France – FR Greece – EL Hungary – HU Ireland – IE Italy – IT Latvia – LV Lithuania – LT Luxembourg – LU Malta - MT Netherlands – NL Poland – PL Portugal – PT Romania - RO Slovenia – SI Slovakia – SK Spain – ES Sweden – SE United Kingdom - UK
3	Year	Year of the submission of the ingredient information (indicate clearly specified time frame e.g. 01.01.07 – 31.12.07)
4	Product type	The type of the tobacco product. Possible product types are: 1 cigarette 2 cigar 3 fine-cut tobacco 4 pipe tobacco 5 waterpipe tobacco 6 tobacco for oral use 7 other tobacco product (please specify)
5	Brand name	Tobacco product brand name, such as for example: Brand X Platinum, or Brand X Menthol.
6	Brand Features	Tobacco product brand features, including for example the following features: pack style, pack size, tobacco product size, and filter or non-filter product.[3,4]
7	Tar yield	To be provided for cigarettes, and measured according to ISO 3308 and ISO 4387.[5]
8	Nicotine yield	To be provided for cigarettes, and measured according to ISO 3308 and ISO 10315.[5]
9	Carbon monoxide yield	To be provided for cigarettes, and measured according to ISO 3308 and ISO 8454.[5]
10	Product unit weight	Weight of one unit of product[6], including the specified pack moisture and expressed in milligrams.
11	Tobacco weight	Weight of tobacco in one unit of product[6], including the moisture content and expressed in milligrams.
12a	Category	Category of the component or material to which the ingredient is added. The first category given should be “tobacco” and the ingredients should be given for each category by descending order of weight. For cigarettes, these categories are: 1 tobacco (burnt) 2 cigarette paper (burnt) 3 sideseam adhesive (burnt) 4 inks used on cigarette paper (burnt) 5 filtration material (unburnt) 6 filter overwrap (unburnt) 7 filter adhesive (unburnt) 8 tipping paper and tipping paper inks (unburnt)
12b	Category	Category of the component or material to which the ingredient is added. The first category given should be “tobacco” and the ingredients should be given for each category by descending order of weight. For cigars, these categories are: 9 tobacco (burnt) 10 filtration material (unburnt) 11 filter overwrap (unburnt) 12 filter adhesive (unburnt) 13 tipping paper (unburnt) 14 adhesive (unburnt) 15 cigar tips (unburnt)

12c	Category	Category of the component or material to which the ingredient is added. The first category given should be “tobacco” and the ingredients should be given for each category by descending order of weight. For tobacco for oral use, these categories are: 16 Tobacco (unburnt) 17 pouch material
12d	Category	Category of the component or material to which the ingredient is added. The first category given should be “tobacco” and the ingredients should be given for each category by descending order of weight. For fine-cut tobacco, pipe tobacco and water-pipe tobacco, the category is: 18 tobacco (burnt) 19 other (please specify)
13	Ingredient name	Name of ingredient added to the tobacco product. Ingredients should be listed for each category (mentioned in column 12) in descending order of weight, starting with ingredients added to tobacco.
14	Ingredient quantity	Exact quantity of ingredient expressed as the mean, standard deviation and 95% confidence limit of the amount of it in milligrams per one unit of product[7,8,9]
15	Ingredient function	Function of the ingredient. The ingredient functions are given in explanatory list A with their code and definition. The function code as given in list A should be stated here, and if an ingredient has several functions, all the function codes should be stated. Function of the ingredient. The possible ingredient functions are: 1 Addictiveness enhancer (incl. nicotine addictiveness enhancer) 2 Adhesive 3 Binder 4 Carrier 5 Colour 6 Combustion modifier 7 Fibre 8 Filler 9 Filter component 10 Filtration material 11 Flavour 12 Humectant 13 Plasticiser 14 Preservative 15 Processing aid 16 Solvent 17 Sizing agent 18 Smoke enhancer 19 Smoke colour modifier 20 Smoke odour modifier 21 Casing 22 Other
16	Registration number	The Chemical Abstracts Service registry number used to identify the ingredient and is the preferred number to be given here. If no CAS number is available, another appropriate ingredient number should be given such as a FEMA, CoE, or FL number (see Table 3 for explanations for these numbers).
17	Ingredient toxicological data available	Please state “yes” or “no”. If “yes”, please fill in information in Table 2.

Footnotes

3 Indicate here also the identity of other package sizes (containing exactly the same products); the submitted information of all of these products will be the same.

4 Some cigar packages/boxes contain more than one single product (different cigars). This must be noted in this column; information on each of the products must be submitted separately.

5 Add name and address of the laboratory in which the tests was carried out.

6 A unit of product is one cigar, one cigarette, 750mg of fine-cut tobacco, and 1 g of pipe, snuff, water-pipe, snus, or chewing tobacco.

7 A unit of product is one cigar, one cigarette, 750mg of fine-cut tobacco, and 1 g of pipe, snuff, water-pipe, snus, or chewing tobacco.

8 Industry shall inform about the change in the composition, provide the time when was the change introduced and the reasoning for the change.

9 A minimum of 6-8 measurements is recommended to get a reliable mean value.

Footnotes to Table 3

1	Name of Manufacturer or Importer: This information is submitted by Philip Morris Products S.A., which owns the relevant intellectual property rights of Philip Morris International products sold in the EU.
2	Country: Member State where the tobacco product is marketed: AT - Austria, BE - Belgium, BU - Bulgaria, CY - Cyprus, CZ - Czech Republic, DK - Denmark, EE - Estonia, FI - Finland, FR - France, DE - Germany, EL - Greece, HU - Hungary, IE - Ireland, IT - Italy, LV - Latvia, LT - Lithuania, LU- Luxembourg, MT - Malta, NL - Netherlands, PL - Poland, PT - Portugal, RO - Romania, SI - Slovenia, SK - Slovakia, ES - Spain, SE - Sweden, UK - United Kingdom.
3	Year: Year of the submission of the ingredient information.
4	Product Type: The type of the tobacco product: 1 Cigarette, 2 Cigar, 3 Fine-cut tobacco, 4 Pipe tobacco, 5 Waterpipe tobacco, 6 Tobacco for oral use, 7 Other tobacco product.
5	Brand name: Tobacco product brand name.
6	Brand features: Tobacco product brand features, including for example the following features: pack style, pack size, tobacco product size, and filter or non-filter product.
7	Tar yield: Provided for cigarettes, and measured according to ISO 3308 and ISO 4387. *All tests were carried out at Philip Morris laboratories, at one of the following locations: Philip Morris Holland BV, Postbus 205, 4600 AE Bergen Op Zoom, Netherlands; PPhilip Morris Manufacturing GmbH Zentrales Analytisches Labor, Neukoellnische Allee 80, 12057 Berlin, Germany; Tabaqueira SA, Avenida Alfredo da Silva 35, Albarraque, 2635-101 Rio de Mouro, Portugal; Philip Morris Czech Republic, Vitezna 1, 28403 Kutna Hora, Czech Republic; Philip Morris International Central Quality Assurance, Quai Jeanrenaud 56, 2000 Neuchâtel, Switzerland; Philip Morris International Papastratos, Mavromichali & Gravias Str, PO Box 80036, 18545 Piraeus, Greece. All Philip Morris laboratories are ISO 17025 accredited.*
8	Nicotine yield: Provided for cigarettes, and measured according to ISO 3308 and ISO 10315. *All tests were carried out at Philip Morris laboratories as indicated in footnote 7.*
9	Carbon monoxide yield: Provided for cigarettes, and measured according to ISO 3308 and ISO 8454. *All tests were carried out at Philip Morris laboratories as indicated in footnote 7.*

10	Product unit weight: Weight of one unit of product, including the specified pack moisture and expressed in milligrams. *One unit of product is one cigar, one cigarette, 750 mg of fine-cut tobacco, 1000 mg of pipe tobacco, snuff, waterpipe, snus or chewing tobacco.*
11	Tobacco weight: Weight of tobacco in one unit of product, including the moisture content and expressed in milligrams. *One unit of product is one cigar, one cigarette, 750 mg of fine-cut tobacco, 1000 mg of pipe tobacco, snuff, waterpipe, snus or chewing tobacco.*
12	Category: Category of the component or material to which the ingredient is added, reported in the following order and according to the following codes. Ingredients are listed in descending order of weight within each of these categories. For cigarettes, the categories are: 1 tobacco (burnt), 2 cigarette paper (burnt), 3 sideseam adhesive (burnt) 4 inks used on cigarette paper (burnt), 5 filtration material (unburnt), 6 filter overwrap (unburnt), 7 filter adhesive (unburnt), 8 tipping paper and tipping paper inks (unburnt). For cigars, these categories are: 1 tobacco, 5 filtration material, 6 filter overwrap, 7 filter adhesive, 8 tipping paper, 9 adhesive, 10 cigar tips. For snus, these categories are: 1 tobacco, 11 pouch material. For fine-cut tobacco, pipe tobacco, snuff, chewing tobacco, and waterpipe tobacco, these categories are: 1 tobacco.
13	Ingredient name: Name of ingredient added to the tobacco product. Ingredients are listed for each category (mentioned in column 12) in descending order of weight starting with ingredients added to tobacco. *Individual flavourings used at quantities below 0.1% of the total tobacco product unit weight are grouped together as a single item.*
14	Ingredient quantity: For ingredients added to tobacco (category 1), exact quantity of ingredient in one unit of product, based on the manufacturer's specifications, expressed in milligrams. For ingredients added to non-tobacco materials (all categories except category 1), the exact quantity of each ingredient used in the brand, based on our suppliers' specifications, expressed in milligrams. Where different suppliers use the same ingredient at different levels, the highest use level of each ingredient is reported.
15	Ingredient function: Function of the ingredient, according to the following codes. The ingredient Functions are given in explanatory List A with their code and definition. If an ingredient has several functions, all the function codes are stated. The function codes are as follows: 1 Addictiveness enhancer, 2 Adhesive, 3 Binder, 4 Carrier, 5 Colour, 6 Combustion modifier, 7 Fibre, 8 Filler, 9 Filter component, 10 Filtration material, 11 Flavour, 12 Humectant, 13 Plasticiser, 14 Preservative, 15 Processing aid, 16 Solvent, 17 Sizing agent, 18 Smoke enhancer, 19 Smoke colour modifier, 20 Smoke odour modifier, 21 Casings, 22 Other.

List A - Explanation for Column 15

Function Code	***Function Name***	***Function Definition***
1	Addictiveness enhancer	**For Tobacco Ingredients use**: To increase the addictive properties of the product.This includes nicotine addictiveness enhancer either through blend scavenging, tobacco column equilibration, synergistic effects of pyrolysis products or shifts in pH.
2	Adhesive	**Both for Tobacco Ingredients and NTIs use**: Base substance contributing directly to adhesion by joining surfaces together and resisting separation.
3	Binder	**For Tobacco Ingredients use**: Maintains the physical state and texture of the product. **For NTIs use**: Substance that provides dry strength and/or maintains the integrity of the material.
4	Carrier	**For NTIs use**: substance used to dissolve, dilute or disperse an ingredient to facilitate handling and application without altering its technological function.
5	Colour	**For Tobacco Ingredients use**: Modifies the colour of a component of a product. F**or NTIs use**: Dye, pigment or other agent used to impart and/or affect optical properties of a component.
6	Combustion modifier	**Both for Tobacco Ingredients and NTIs uses**: Influences how the product burns.
7	Fibre	**For Tobacco Ingredients use**: starting substance and aid for homogenized and reconstituted tobacco. **For NTIs use**: Starting substance and basis for paper materials.
8	Filler	**For Tobacco ingredients use**: Contributes to the bulk of the product without contributing significantly to odour, taste, flavour or aroma. **For NTIs use**: Contributes to the bulk of the product without contributing significantly to odour, taste, flavour or aroma. It is also used to control physical characteristics such as opacity and shine.
9	Filter component	**For NTIs use**: Substance in a filter assembly with no inherent filtration properties.
10	Filtration material	**For NTIs use**: Substance with inherent filtration properties.
11	Flavour	**For Tobacco Ingredients use**: Imparts a specific taste, flavour or aroma to a tobacco product.
12	Humectant	**For Tobacco Ingredients use**: Prevents the product from drying out, includes water.
13	Plasticiser	**For NTIs use**: Increases adhesion and flexibility of inks and adhesives on the product. Used to harden filter tow to maintain physical characteristics of a filter.

14	Preservative	**For Tobacco Ingredients use**: Protects the product from deterioration caused by micro-organisms.
15	Processing aid	**For Tobacco Ingredients use**: These are added by the tobacco manufacturers to facilitate the manufacturing process and they are either not present in the end product or occur in residual amounts and have no function in the final product. **For NTIs use**: Any substances intentionally added to a material in the course of its manufacture to facilitate processing of either that material or the tobacco product by fulfilling a certain technological purpose. This may result in the unintentional, but technically unavoidable presence of the substance or its derivatives in the finished product, which have no technological effect.
16	Solvent	**For Tobacco Ingredients use**: Used to dissolve, dilute an ingredient without altering its function in order to facilitate handling and application. Some solvents may contain denaturants.
17	Sizing agent	**For NTIs use**: Substance applied to change the wetting properties and surface tension of paper.
18	Smoke enhancer	**For Tobacco Ingredients use**: Substance used to ameliorate the effects of smoke by making it more palatable either through the use of sweeteners or chemical agents that negate the normal airway aversion to smoke or have pharmacological action.
19	Smoke colour modifier	**For Tobacco Ingredients use**: Substance used to alter the colour of main and/or side-stream smoke.
20	Smoke odour modifier	**For Tobacco Ingredients use**: Substance used to alter the odour of main and/or side-stream smoke.
21	Casings	**For Tobacco Ingredients use**: Ingredients added during the leaf processing to improve the basic tobacco taste, processing ability and moisture-holding capacity.
22	Other	Other function not defined above.

Column Spalte	Column title Spaltenüberschrift	Explanation (E)
1	Name of Manufacturer or Importer Name des Herstellers oder Impoteurs	Name of the company manufacturing or importing the tobacco product.
2	Country Land	Member State where the tobacco product is marketed: Germany – DE Austria – AT Belgium – BE Bulgaria - BU Cyprus – CY Czech Republic – CZ Denmark – DK Estonia – EE Finland – FI France – FR Greece – EL Hungary – HU Ireland – IE Italy – IT Latvia – LV Lithuania – LT Luxembourg – LU Malta - MT Netherlands – NL Poland – PL Portugal – PT Romania - RO Slovenia – SI Slovakia – SK Spain – ES Sweden – SE United Kingdom - UK
3	Year Jahr	Year of the submission of the ingredient information (indicate clearly specified time frame e.g. 01.01.07 – 31.12.07)
4	Product type Produkttyp	The type of the tobacco product. Possible product types are: 1 cigarette 2 cigar 3 fine-cut tobacco 4 pipe tobacco 5 waterpipe tobacco 6 tobacco for oral use 7 other tobacco product (please specify)
5	Brand name Markennname	Tobacco product brand name, such as for example: Brand X Platinum, or Brand X Menthol.
6	Brand Features Marken-Merkmal	Tobacco product brand features, including for example the following features: pack style, pack size, tobacco product size, and filter or non-filter product.[3,4]
7	Tar yield Teergehalt	To be provided for cigarettes, and measured according to ISO 3308 and ISO 4387.[5]
8	Nicotine yield Nikotingehalt	To be provided for cigarettes, and measured according to ISO 3308 and ISO 10315.[5]

9	Carbon monoxide yield Kohlenmonoxid-Gehalt	To be provided for cigarettes, and measured according to ISO 3308 and ISO 8454.[5]
10	Product unit weight Gewicht Produkteinheit	Weight of one unit of product[6], including the specified pack moisture and expressed in milligrams.
11	Tobacco weight Gewicht Tabak	Weight of tobacco in one unit of product[6], including the moisture content and expressed in milligrams.
12a	Category Kategorie	Category of the component or material to which the ingredient is added. The first category given should be "tobacco" and the ingredients should be given for each category by descending order of weight. For cigarettes, these categories are: 1 tobacco (burnt) 2 cigarette paper (burnt) 3 sideseam adhesive (burnt) 4 inks used on cigarette paper (burnt) 5 filtration material (unburnt) 6 filter overwrap (unburnt) 7 filter adhesive (unburnt) 8 tipping paper and tipping paper inks (unburnt)
12b	Category Kategorie	Category of the component or material to which the ingredient is added. The first category given should be "tobacco" and the ingredients should be given for each category by descending order of weight. For cigars, these categories are: 9 tobacco (burnt) 10 filtration material (unburnt) 11 filter overwrap (unburnt) 12 filter adhesive (unburnt) 13 tipping paper (unburnt) 14 adhesive (unburnt) 15 cigar tips (unburnt)
12c	Category Kategorie	Category of the component or material to which the ingredient is added. The first category given should be "tobacco" and the ingredients should be given for each category by descending order of weight. For tobacco for oral use, these categories are: 16 Tobacco (unburnt) 17 pouch material
12d	Category Kategorie	Category of the component or material to which the ingredient is added. The first category given should be "tobacco" and the ingredients should be given for each category by descending order of weight. For fine-cut tobacco, pipe tobacco and water-pipe tobacco, the category is: 18 tobacco (burnt) 19 other (please specify)
13	Ingredient name Zusatzstsoff Name	Name of ingredient added to the tobacco product. Ingredients should be listed for each category (mentioned in column 12) in descending order of weight, starting with ingredients added to tobacco.

14	Ingredient quantity Zusatzstoff Menge	Exact quantity of ingredient expressed as the mean, standard deviation and 95% confidence limit of the amount of it in milligrams per one unit of product[7, 8, 9],
15	Ingredient function Zusatzstoff Funktion	Function of the ingredient. The ingredient functions are given in explanatory list A with their code and definition. The function code as given in list A should be stated here, and if an ingredient has several functions, all the function codes should be stated. Function of the ingredient. The possible ingredient functions are: 1 Addictiveness enhancer (incl. nicotine addictiveness enhancer) 2 Adhesive 3 Binder 4 Carrier 5 Colour 6 Combustion modifier 7 Fibre 8 Filler 9 Filter component 10 Filtration material 11 Flavour 12 Humectant 13 Plasticiser 14 Preservative 15 Processing aid 16 Solvent 17 Sizing agent 18 Smoke enhancer 19 Smoke colour modifier 20 Smoke odour modifier 21 Casing 22 Other

Footnotes
Fußnoten

3 Indicate here also the identity of other package sizes (containing exactly the same products); the submitted information of all of these products will be the same.

4 Some cigar packages/boxes contain more than one single product (different cigars). This must be noted in this column; information on each of the products must be submitted separately.

5 Add name and address of the laboratory in which the tests was carried out.

6 A unit of product is one cigar, one cigarette, 750mg of fine-cut tobacco, and 1 g of pipe, snuff, water-pipe, snus, or chewing tobacco.

7 A unit of product is one cigar, one cigarette, 750mg of fine-cut tobacco, and 1 g of pipe, snuff, water-pipe, snus, or chewing tobacco.

8 Industry shall inform about the change in the composition, provide the time when was the change introduced and the reasoning for the change.

9 A minimum of 6-8 measurements is recommended to get a reliable mean value.

Erklärung (D)
Name des Herstellers oder Importeurs des Tabakprodukts
Mitgliedstaat, in dem das Produkt vermarktet wird: Germany – DE Austria – AT Belgium – BE Bulgaria - BU Cyprus – CY Czech Republic – CZ Denmark – DK Estonia – EE Finland – FI France – FR Greece – EL Hungary – HU Ireland – IE Italy – IT Latvia – LV Lithuania – LT Luxembourg – LU Malta - MT Netherlands – NL Poland – PL Portugal – PT Romania - RO Slovenia – SI Slovakia – SK Spain – ES Sweden – SE United Kingdom - UK
Jahr der Übermittlung der Zusatzstoffinformationen (geben Sie den Zeitraum an z. B. 01.01.07 - 31.12.07)
Art des Tabakprodukts. Mögliche Produkttypen sind: 1 Zigarette 2 Zigarre 3 Feinschnitttabak 4 Pfeifentabak 5 Wasserpfeifentabak 6 Kautabak 7 andere Tabakprodukte (bitte angeben)
Markenname des Tabakprodukts, z.B.: Marke X Platinum oder Marke X Menthol.
Markenmerkmale des Tabakprodukts, z. B.: Packungstyp, Packungsgröße, Produktgröße, mit oder ohne Filter.[3,4]
Für Zigaretten, Messung nach ISO 3308 und ISO 43875.[5]
Für Zigaretten, Messung nach ISO 3308 und ISO 103155.[5]

Für Zigaretten, Messung nach ISO 3308 und ISO 84545.[5]
Gewicht der Produkteinheit[6], einschließlich spez. Feuchtigkeit, angegeben in mg.
Gewicht des Tabaks einer Produkteinheit, einschließlich Feuchtigkeit, angegeben in mg.
Kategorie, die den Zusatzstoff enthält. Die erste Kategorie ist Tabak, die Zusatzstoffe werden für jede Kategorie in absteigender Reihenfolge ihres Gewichtsanteils angegeben. Kategorien für Zigaretten: 1 Tabak (wird verbrannt) 2 Zigarettenpapier (wird verbrannt) 3 Nahtleim (wird verbrannt) 4 Farbstoff für Zigarettenpapier (wird verbrannt) 5 Filtermaterial (wird nicht verbrannt) 6 Filterumhüllung (wird nicht verbrannt) 7 Filterleim (wird nicht verbrannt) 8 Filterpapier und Farbstoff
Kategorie, die den Zusatzstoff enthält. Die erste Kategorie ist Tabak, die Zusatzstoffe werden für jede Kategorie in absteigender Reihenfolge ihres Gewichtsanteils angegeben. Kategorien für Zigarren: 9 Tabak (wird verbrannt) 10 Filtermaterial (wird nicht verbrannt) 11 Filterumhüllung (wird nicht verbrannt) 12 Filterleim (wird nicht verbrannt) 13 Filterpapier (wird nicht verbrannt) 14 Klebemittel (wird nicht verbrannt) 15 Zigarrenspitze (wird nicht verbrannt)
Kategorie, die den Zusatzstoff enthält. Die erste Kategorie ist Tabak, die Zusatzstoffe werden für jede Kategorie in absteigender Reihenfolge ihres Gewichtsanteils angegeben. Kategorien für Kautabak: 16 Tabak (wird nicht verbrannt) 17 Beutelmaterial
Kategorie, die den Zusatzstoff enthält. Die erste Kategorie ist Tabak, die Zusatzstoffe werden für jede Kategorie in absteigender Reihenfolge ihres Gewichtsanteils angegeben. Kategorien für Feinschnitt-, Pfeifen- und Wasserpfeifentabak: 18 Tabak (wird verbrannt) 19 anderes (bitte angeben)
Name des Zusatzstoffs - Zusatzstoffe müssen für jede Kategorie (s. Spalte 12) in absteigender Reihenfolge ihrer Gewichtsanteile, beginnend mit den Zusatzstoffen zu Tabak, angegeben werde.

Genaue Mengenangabe, angegeben mit Mittelwert, Standardabweichung, 95%-Konfidenzintervall in mg/Produkteinheit[7, 8, 9].
Funktion: Die Funktion ist in nachfolgender Liste kodiert. Geben Sie den Kode an. Hat ein Zusatzstoff mehrere Funktionen müssen alle kodiert werden. Mögliche Funktionen sind: 1 Suchtverstärker 2 Klebemittel 3 Bindemittel 4 Trägerstoff 5 Farbstoff 6 bbrennmittel 7 Faser 8 Füllstoff 9 Filterkomponente 10 Filtermaterial 11 Aroma/Geschmacksstoff 12 Feuchthaltemittel 13 Weichmacher 14 Konservierungsstoff 15 Technischer Hilfsstoff 16 Lösungsmittel 17 Klebe-, Haft- oder Verdickungsmittel 18 Rauchverstärker 19 Farbumwandler 20 Geruchsumwandler 21 Umhüllung 22 Andere

Geben Sie hier auch andere Packungsgrößen an.

Angabe , wenn Zigarrenpackung mehr als ein Produkt enthält. Übermittlung der Zusatzstoffe für jedes Produkt ist erforderlich.

Name und Adresse des Prüflabors in dem der Test durchgeführt wurde.

Produkteinheit ist: 1 Zigarre, 1 Zigarette, 750 mg Feinschnitttabak, 1 g Pfeifen-, Schnupf-, Wasserpfeifen- oder Kautabak

Produkteinheit ist: 1 Zigarre, 1 Zigarette, 750 mg Feinschnitttabak, 1 g Pfeifen-, Schnupf-, Wasserpfeifen- oder Kautabak

Änderung der Zusammensetzung ist mit dem Zeitpunkt der Änderung und Begründung anzugeben

Mindestens 6-8 Messungen sind für eine verläsliche Mittelwertberechnung empfohlen.

Public list of all ingredients[10] in the tobacco prodcut with exact quantities, by brand and type of product

Explanation and structure of data on the tobacco product by brand and type of product

Column	Column title	Explanation (E)
1	Name of Manufacturer or Importer	Name of the company manufacturing or importing the tobacco product.
2	Country	Member State where the tobacco product is marketed: Germany – DE Austria – AT Belgium – BE Bulgaria - BU Cyprus – CY Czech Republic – CZ Denmark – DK Estonia – EE Finland – FI France – FR Greece – EL Hungary – HU Ireland – IE Italy – IT Latvia – LV Lithuania – LT Luxembourg – LU Malta - MT Netherlands – NL Poland – PL Portugal – PT Romania - RO Slovenia – SI Slovakia – SK Spain – ES Sweden – SE United Kingdom - UK
3	Year	Year of the submission of the ingredient information (indicate clearly specified time frame e.g. 01.01.07 – 31.12.07)
4	Product type	The type of the tobacco product. Possible product types are: 1 cigarette 2 cigar 3 fine-cut tobacco 4 pipe tobacco 5 waterpipe tobacco 6 tobacco for oral use 7 other tobacco product (please specify)
5	Brand name	Tobacco product brand name, such as for example: Brand X Platinum, or Brand X Menthol.
6	Brand Features	Tobacco product brand features, including for example the following features: pack style, pack size, tobacco product size, and filter or non-filter product.[3,4]
7	Tar yield	To be provided for cigarettes, and measured according to ISO 3308 and ISO 4387.[5]
8	Nicotine yield	To be provided for cigarettes, and measured according to ISO 3308 and ISO 10315.[5]
9	Carbon monoxide yield	To be provided for cigarettes, and measured according to ISO 3308 and ISO 8454.[5]
10	Product unit weight	Weight of one unit of product[6], including the specified pack moisture and expressed in milligrams.
11	Tobacco weight	Weight of tobacco in one unit of product[6], including the moisture content and expressed in milligrams.
12a	Category	Category of the component or material to which the ingredient is added. The first category given should be “tobacco” and the ingredients should be given for each category by descending order of weight. For cigarettes, these categories are: 1 tobacco (burnt) 2 cigarette paper (burnt) 3 sideseam adhesive (burnt) 4 inks used on cigarette paper (burnt) 5 filtration material (unburnt) 6 filter overwrap (unburnt) 7 filter adhesive (unburnt) 8 tipping paper and tipping paper inks (unburnt)
12b	Category	Category of the component or material to which the ingredient is added. The first category given should be “tobacco” and the ingredients should be given for each category by descending order of weight. For cigars, these categories are: 9 tobacco (burnt) 10 filtration material (unburnt) 11 filter overwrap (unburnt) 12 filter adhesive (unburnt) 13 tipping paper (unburnt) 14 adhesive (unburnt) 15 cigar tips (unburnt)

12c	Category	Category of the component or material to which the ingredient is added. The first category given should be “tobacco” and the ingredients should be given for each category by descending order of weight. For tobacco for oral use, these categories are: 16 Tobacco (unburnt) 17 pouch material
12d	Category	Category of the component or material to which the ingredient is added. The first category given should be “tobacco” and the ingredients should be given for each category by descending order of weight. For fine-cut tobacco, pipe tobacco and water-pipe tobacco, the category is: 18 tobacco (burnt) 19 other (please specify)
13	Ingredient name	Name of ingredient added to the tobacco product. Ingredients should be listed for each category (mentioned in column 12) in descending order of weight, starting with ingredients added to tobacco.
14	Ingredient quantity	Exact quantity of ingredient expressed as the mean, standard deviation and 95% confidence limit of the amount of it in milligrams per one unit of product[7,8,9]
15	Ingredient function	Function of the ingredient. The ingredient functions are given in explanatory list A with their code and definition. The function code as given in list A should be stated here, and if an ingredient has several functions, all the function codes should be stated. Function of the ingredient. The possible ingredient functions are: 1 Addictiveness enhancer (incl. nicotine addictiveness enhancer) 2 Adhesive 3 Binder 4 Carrier 5 Colour 6 Combustion modifier 7 Fibre 8 Filler 9 Filter component 10 Filtration material 11 Flavour 12 Humectant 13 Plasticiser 14 Preservative 15 Processing aid 16 Solvent 17 Sizing agent 18 Smoke enhancer 19 Smoke colour modifier 20 Smoke odour modifier 21 Casing 22 Other
16	Registration number	The Chemical Abstracts Service registry number used to identify the ingredient and is the preferred number to be given here. If no CAS number is available, another appropriate ingredient number should be given such as a FEMA, CoE, or FL number (see Table 3 for explanations for these numbers).
17	Ingredient toxicological data available	Please state “yes” or “no”. If “yes”, please fill in information in Table 2.

Footnotes

3 Indicate here also the identity of other package sizes (containing exactly the same products); the submitted information of all of these products will be the same.

4 Some cigar packages/boxes contain more than one single product (different cigars). This must be noted in this column; information on each of the products must be submitted separately.

5 Add name and address of the laboratory in which the tests was carried out.

6 A unit of product is one cigar, one cigarette, 750mg of fine-cut tobacco, and 1 g of pipe, snuff, water-pipe, snus, or chewing tobacco.

7 A unit of product is one cigar, one cigarette, 750mg of fine-cut tobacco, and 1 g of pipe, snuff, water-pipe, snus, or chewing tobacco.

8 Industry shall inform about the change in the composition, provide the time when was the change introduced and the reasoning for the change.

9 A minimum of 6-8 measurements is recommended to get a reliable mean value.

Explanation and structure of data on the tobacco product by brand and type of product

Column	Column title	Explanation (E)
1	Name of Manufacturer or Importer	Name of the company manufacturing or importing the tobacco product.
2	Country	Member State where the tobacco product is marketed: Germany – DE Austria – AT Belgium – BE Bulgaria - BU Cyprus – CY Czech Republic – CZ Denmark – DK Estonia – EE Finland – FI France – FR Greece – EL Hungary – HU Ireland – IE Italy – IT Latvia – LV Lithuania – LT Luxembourg – LU Malta - MT Netherlands – NL Poland – PL Portugal – PT Romania - RO Slovenia – SI Slovakia – SK Spain – ES Sweden – SE United Kingdom - UK
3	Year	Year of the submission of the ingredient information (indicate clearly specified time frame e.g. 01.01.07 – 31.12.07)
4	Product type	The type of the tobacco product. Possible product types are: 1 cigarette 2 cigar 3 fine-cut tobacco 4 pipe tobacco 5 waterpipe tobacco 6 tobacco for oral use 7 other tobacco product (please specify)
5	Brand name	Tobacco product brand name, such as for example: Brand X Platinum, or Brand X Menthol.
6	Brand Features	Tobacco product brand features, including for example the following features: pack style, pack size, tobacco product size, and filter or non-filter product.[3,4]
7	Tar yield	To be provided for cigarettes, and measured according to ISO 3308 and ISO 4387.[5]
8	Nicotine yield	To be provided for cigarettes, and measured according to ISO 3308 and ISO 10315.[5]
9	Carbon monoxide yield	To be provided for cigarettes, and measured according to ISO 3308 and ISO 8454.[5]
10	Product unit weight	Weight of one unit of product[6], including the specified pack moisture and expressed in milligrams.
11	Tobacco weight	Weight of tobacco in one unit of product[6], including the moisture content and expressed in milligrams.
12a	Category	Category of the component or material to which the ingredient is added. The first category given should be “tobacco” and the ingredients should be given for each category by descending order of weight. For cigarettes, these categories are: 1 tobacco (burnt) 2 cigarette paper (burnt) 3 sideseam adhesive (burnt) 4 inks used on cigarette paper (burnt) 5 filtration material (unburnt) 6 filter overwrap (unburnt) 7 filter adhesive (unburnt) 8 tipping paper and tipping paper inks (unburnt)
12b	Category	Category of the component or material to which the ingredient is added. The first category given should be “tobacco” and the ingredients should be given for each category by descending order of weight. For cigars, these categories are: 9 tobacco (burnt) 10 filtration material (unburnt) 11 filter overwrap (unburnt) 12 filter adhesive (unburnt) 13 tipping paper (unburnt) 14 adhesive (unburnt) 15 cigar tips (unburnt)

12c	Category	Category of the component or material to which the ingredient is added. The first category given should be “tobacco” and the ingredients should be given for each category by descending order of weight. For tobacco for oral use, these categories are: 16 Tobacco (unburnt) 17 pouch material
12d	Category	Category of the component or material to which the ingredient is added. The first category given should be “tobacco” and the ingredients should be given for each category by descending order of weight. For fine-cut tobacco, pipe tobacco and water-pipe tobacco, the category is: 18 tobacco (burnt) 19 other (please specify)
13	Ingredient name	Name of ingredient added to the tobacco product. Ingredients should be listed for each category (mentioned in column 12) in descending order of weight, starting with ingredients added to tobacco.
14	Ingredient quantity	Exact quantity of ingredient expressed as the mean, standard deviation and 95% confidence limit of the amount of it in milligrams per one unit of product[7,8,9]
15	Ingredient function	Function of the ingredient. The ingredient functions are given in explanatory list A with their code and definition. The function code as given in list A should be stated here, and if an ingredient has several functions, all the function codes should be stated. Function of the ingredient. The possible ingredient functions are: 1 Addictiveness enhancer (incl. nicotine addictiveness enhancer) 2 Adhesive 3 Binder 4 Carrier 5 Colour 6 Combustion modifier 7 Fibre 8 Filler 9 Filter component 10 Filtration material 11 Flavour 12 Humectant 13 Plasticiser 14 Preservative 15 Processing aid 16 Solvent 17 Sizing agent 18 Smoke enhancer 19 Smoke colour modifier 20 Smoke odour modifier 21 Casing 22 Other
16	Registration number	The Chemical Abstracts Service registry number used to identify the ingredient and is the preferred number to be given here. If no CAS number is available, another appropriate ingredient number should be given such as a FEMA, CoE, or FL number (see Table 3 for explanations for these numbers).
17	Ingredient toxicological data available	Please state “yes” or “no”. If “yes”, please fill in information in Table 2.

Footnotes

3 Indicate here also the identity of other package sizes (containing exactly the same products); the submitted information of all of these products will be the same.

4 Some cigar packages/boxes contain more than one single product (different cigars). This must be noted in this column; information on each of the products must be submitted separately.

5 Add name and address of the laboratory in which the tests was carried out.

6 A unit of product is one cigar, one cigarette, 750mg of fine-cut tobacco, and 1 g of pipe, snuff, water-pipe, snus, or chewing tobacco.

7 A unit of product is one cigar, one cigarette, 750mg of fine-cut tobacco, and 1 g of pipe, snuff, water-pipe, snus, or chewing tobacco.

8 Industry shall inform about the change in the composition, provide the time when was the change introduced and the reasoning for the change.

9 A minimum of 6-8 measurements is recommended to get a reliable mean value.

Explanation and structure of data on the tobacco product by brand and type of product

Column	Column title	Explanation (E)
1	Name of Manufacturer or Importer	Name of the company manufacturing or importing the tobacco product.
2	Country	Member State where the tobacco product is marketed: Germany – DE Austria – AT Belgium – BE Bulgaria - BU Cyprus – CY Czech Republic – CZ Denmark – DK Estonia – EE Finland – FI France – FR Greece – EL Hungary – HU Ireland – IE Italy – IT Latvia – LV Lithuania – LT Luxembourg – LU Malta - MT Netherlands – NL Poland – PL Portugal – PT Romania - RO Slovenia – SI Slovakia – SK Spain – ES Sweden – SE United Kingdom - UK
3	Year	Year of the submission of the ingredient information (indicate clearly specified time frame e.g. 01.01.07 – 31.12.07)
4	Product type	The type of the tobacco product. Possible product types are: 1 cigarette 2 cigar 3 fine-cut tobacco 4 pipe tobacco 5 waterpipe tobacco 6 tobacco for oral use 7 other tobacco product (please specify)
5	Brand name	Tobacco product brand name, such as for example: Brand X Platinum, or Brand X Menthol.
6	Brand Features	Tobacco product brand features, including for example the following features: pack style, pack size, tobacco product size, and filter or non-filter product.[3,4]
7	Tar yield	To be provided for cigarettes, and measured according to ISO 3308 and ISO 4387.[5]
8	Nicotine yield	To be provided for cigarettes, and measured according to ISO 3308 and ISO 10315.[5]
9	Carbon monoxide yield	To be provided for cigarettes, and measured according to ISO 3308 and ISO 8454.[5]
10	Product unit weight	Weight of one unit of product[6], including the specified pack moisture and expressed in milligrams.
11	Tobacco weight	Weight of tobacco in one unit of product[6], including the moisture content and expressed in milligrams.
12a	Category	Category of the component or material to which the ingredient is added. The first category given should be “tobacco” and the ingredients should be given for each category by descending order of weight. For cigarettes, these categories are: 1 tobacco (burnt) 2 cigarette paper (burnt) 3 sideseam adhesive (burnt) 4 inks used on cigarette paper (burnt) 5 filtration material (unburnt) 6 filter overwrap (unburnt) 7 filter adhesive (unburnt) 8 tipping paper and tipping paper inks (unburnt)
12b	Category	Category of the component or material to which the ingredient is added. The first category given should be “tobacco” and the ingredients should be given for each category by descending order of weight. For cigars, these categories are: 9 tobacco (burnt) 10 filtration material (unburnt) 11 filter overwrap (unburnt) 12 filter adhesive (unburnt) 13 tipping paper (unburnt) 14 adhesive (unburnt) 15 cigar tips (unburnt)

12c	Category	Category of the component or material to which the ingredient is added. The first category given should be “tobacco” and the ingredients should be given for each category by descending order of weight. For tobacco for oral use, these categories are: 16 Tobacco (unburnt) 17 pouch material
12d	Category	Category of the component or material to which the ingredient is added. The first category given should be “tobacco” and the ingredients should be given for each category by descending order of weight. For fine-cut tobacco, pipe tobacco and water-pipe tobacco, the category is: 18 tobacco (burnt) 19 other (please specify)
13	Ingredient name	Name of ingredient added to the tobacco product. Ingredients should be listed for each category (mentioned in column 12) in descending order of weight, starting with ingredients added to tobacco.
14	Ingredient quantity	Exact quantity of ingredient expressed as the mean, standard deviation and 95% confidence limit of the amount of it in milligrams per one unit of product[7,8,9]
15	Ingredient function	Function of the ingredient. The ingredient functions are given in explanatory list A with their code and definition. The function code as given in list A should be stated here, and if an ingredient has several functions, all the function codes should be stated. Function of the ingredient. The possible ingredient functions are: 1 Addictiveness enhancer (incl. nicotine addictiveness enhancer) 2 Adhesive 3 Binder 4 Carrier 5 Colour 6 Combustion modifier 7 Fibre 8 Filler 9 Filter component 10 Filtration material 11 Flavour 12 Humectant 13 Plasticiser 14 Preservative 15 Processing aid 16 Solvent 17 Sizing agent 18 Smoke enhancer 19 Smoke colour modifier 20 Smoke odour modifier 21 Casing 22 Other
16	Registration number	The Chemical Abstracts Service registry number used to identify the ingredient and is the preferred number to be given here. If no CAS number is available, another appropriate ingredient number should be given such as a FEMA, CoE, or FL number (see Table 3 for explanations for these numbers).
17	Ingredient toxicological data available	Please state “yes” or “no”. If “yes”, please fill in information in Table 2.

Footnotes

3 Indicate here also the identity of other package sizes (containing exactly the same products); the submitted information of all of these products will be the same.

4 Some cigar packages/boxes contain more than one single product (different cigars). This must be noted in this column; information on each of the products must be submitted separately.

5 Add name and address of the laboratory in which the tests was carried out.

6 A unit of product is one cigar, one cigarette, 750mg of fine-cut tobacco, and 1 g of pipe, snuff, water-pipe, snus, or chewing tobacco.

7 A unit of product is one cigar, one cigarette, 750mg of fine-cut tobacco, and 1 g of pipe, snuff, water-pipe, snus, or chewing tobacco.

8 Industry shall inform about the change in the composition, provide the time when was the change introduced and the reasoning for the change.

9 A minimum of 6-8 measurements is recommended to get a reliable mean value.

Column	Column title	Explanation (E)
1	Name of Manufacturer or Importer	Name of the company manufacturing or importing the tobacco product.
2	Country	Member State where the tobacco product is marketed: Germany – DE Austria – AT Belgium – BE Bulgaria - BU Cyprus – CY Czech Republic – CZ Denmark – DK Estonia – EE Finland – FI France – FR Greece – EL Hungary – HU Ireland – IE Italy – IT Latvia – LV Lithuania – LT Luxembourg – LU Malta - MT Netherlands – NL Poland – PL Portugal – PT Romania - RO Slovenia – SI Slovakia – SK Spain – ES Sweden – SE United Kingdom - UK
3	Year	Year of the submission of the ingredient information (indicate clearly specified time frame e.g. 01.01.07 – 31.12.07)
4	Product type	The type of the tobacco product. Possible product types are: 1 cigarette 2 cigar 3 fine-cut tobacco 4 pipe tobacco 5 waterpipe tobacco 6 tobacco for oral use 7 other tobacco product (please specify)
5	Brand name	Tobacco product brand name, such as for example: Brand X Platinum, or Brand X Menthol.
6	Brand Features	Tobacco product brand features, including for example the following features: pack style, pack size, tobacco product size, and filter or non-filter product.[3,4]
7	Tar yield	To be provided for cigarettes, and measured according to ISO 3308 and ISO 4387.[5]
8	Nicotine yield	To be provided for cigarettes, and measured according to ISO 3308 and ISO 10315.[5]
9	Carbon monoxide yield	To be provided for cigarettes, and measured according to ISO 3308 and ISO 8454.[5]
10	Product unit weight	Weight of one unit of product[6], including the specified pack moisture and expressed in milligrams.
11	Tobacco weight	Weight of tobacco in one unit of product[6], including the moisture content and expressed in milligrams.
12a	Category	Category of the component or material to which the ingredient is added. The first category given should be “tobacco” and the ingredients should be given for each category by descending order of weight. For cigarettes, these categories are: 1 tobacco (burnt) 2 cigarette paper (burnt) 3 sideseam adhesive (burnt) 4 inks used on cigarette paper (burnt) 5 filtration material (unburnt) 6 filter overwrap (unburnt) 7 filter adhesive (unburnt) 8 tipping paper and tipping paper inks (unburnt)
12b	Category	Category of the component or material to which the ingredient is added. The first category given should be “tobacco” and the ingredients should be given for each category by descending order of weight. For cigars, these categories are: 9 tobacco (burnt) 10 filtration material (unburnt) 11 filter overwrap (unburnt) 12 filter adhesive (unburnt) 13 tipping paper (unburnt) 14 adhesive (unburnt) 15 cigar tips (unburnt)

12c	Category	Category of the component or material to which the ingredient is added. The first category given should be “tobacco” and the ingredients should be given for each category by descending order of weight. For tobacco for oral use, these categories are: 16 Tobacco (unburnt) 17 pouch material
12d	Category	Category of the component or material to which the ingredient is added. The first category given should be “tobacco” and the ingredients should be given for each category by descending order of weight. For fine-cut tobacco, pipe tobacco and water-pipe tobacco, the category is: 18 tobacco (burnt) 19 other (please specify)
13	Ingredient name	Name of ingredient added to the tobacco product. Ingredients should be listed for each category (mentioned in column 12) in descending order of weight, starting with ingredients added to tobacco.
14	Ingredient quantity	Exact quantity of ingredient expressed as the mean, standard deviation and 95% confidence limit of the amount of it in milligrams per one unit of product[7,8,9]
15	Ingredient function	Function of the ingredient. The ingredient functions are given in explanatory list A with their code and definition. The function code as given in list A should be stated here, and if an ingredient has several functions, all the function codes should be stated. Function of the ingredient. The possible ingredient functions are: 1 Addictiveness enhancer (incl. nicotine addictiveness enhancer) 2 Adhesive 3 Binder 4 Carrier 5 Colour 6 Combustion modifier 7 Fibre 8 Filler 9 Filter component 10 Filtration material 11 Flavour 12 Humectant 13 Plasticiser 14 Preservative 15 Processing aid 16 Solvent 17 Sizing agent 18 Smoke enhancer 19 Smoke colour modifier 20 Smoke odour modifier 21 Casing 22 Other
16	Registration number	The Chemical Abstracts Service registry number used to identify the ingredient and is the preferred number to be given here. If no CAS number is available, another appropriate ingredient number should be given such as a FEMA, CoE, or FL number (see Table 3 for explanations for these numbers).
17	Ingredient toxicological data available	Please state “yes” or “no”. If “yes”, please fill in information in Table 2.

Footnotes

3 Indicate here also the identity of other package sizes (containing exactly the same products); the submitted information of all of these products will be the same.

4 Some cigar packages/boxes contain more than one single product (different cigars). This must be noted in this column; information on each of the products must be submitted separately.

5 Add name and address of the laboratory in which the tests was carried out.

6 A unit of product is one cigar, one cigarette, 750mg of fine-cut tobacco, and 1 g of pipe, snuff, water-pipe, snus, or chewing tobacco.

7 A unit of product is one cigar, one cigarette, 750mg of fine-cut tobacco, and 1 g of pipe, snuff, water-pipe, snus, or chewing tobacco.

8 Industry shall inform about the change in the composition, provide the time when was the change introduced and the reasoning for the change.

9 A minimum of 6-8 measurements is recommended to get a reliable mean value.

List to regulators of all ingredients in the tobacco product with exact quantities, by brand and type of product

Column Spalte	Column title Spaltenüberschrift	Explanation (E)
1	Name of Manufacturer or Importer Name des Herstellers oder Impoteurs	Name of the company manufacturing or importing the tobacco product.
2	Country Land	Member State where the tobacco product is marketed: Germany – DE Austria – AT Belgium – BE Bulgaria - BU Cyprus – CY Czech Republic – CZ Denmark – DK Estonia – EE Finland – FI France – FR Greece – EL Hungary – HU Ireland – IE Italy – IT Latvia – LV Lithuania – LT Luxembourg – LU Malta - MT Netherlands – NL Poland – PL Portugal – PT Romania - RO Slovenia – SI Slovakia – SK Spain – ES Sweden – SE United Kingdom - UK
3	Year Jahr	Year of the submission of the ingredient information (indicate clearly specified time frame e.g. 01.01.07 – 31.12.07)
4	Product type Produkttyp	The type of the tobacco product. Possible product types are: 1 cigarette 2 cigar 3 fine-cut tobacco 4 pipe tobacco 5 waterpipe tobacco 6 tobacco for oral use 7 other tobacco product (please specify)
5	Brand name Markennname	Tobacco product brand name, such as for example: Brand X Platinum, or Brand X Menthol.
6	Brand Features Marken-Merkmal	Tobacco product brand features, including for example the following features: pack style, pack size, tobacco product size, and filter or non-filter product.[3,4]
7	Tar yield Teergehalt	To be provided for cigarettes, and measured according to ISO 3308 and ISO 4387.[5]
8	Nicotine yield Nikotingehalt	To be provided for cigarettes, and measured according to ISO 3308 and ISO 10315.[5]

9	Carbon monoxide yield Kohlenmonoxid-Gehalt	To be provided for cigarettes, and measured according to ISO 3308 and ISO 8454.[5]
10	Product unit weight Gewicht Produkteinheit	Weight of one unit of product[6], including the specified pack moisture and expressed in milligrams.
11	Tobacco weight Gewicht Tabak	Weight of tobacco in one unit of product[6], including the moisture content and expressed in milligrams.
12a	Category Kategorie	Category of the component or material to which the ingredient is added. The first category given should be "tobacco" and the ingredients should be given for each category by descending order of weight. For cigarettes, these categories are: 1 tobacco (burnt) 2 cigarette paper (burnt) 3 sideseam adhesive (burnt) 4 inks used on cigarette paper (burnt) 5 filtration material (unburnt) 6 filter overwrap (unburnt) 7 filter adhesive (unburnt) 8 tipping paper and tipping paper inks (unburnt)
12b	Category Kategorie	Category of the component or material to which the ingredient is added. The first category given should be "tobacco" and the ingredients should be given for each category by descending order of weight. For cigars, these categories are: 9 tobacco (burnt) 10 filtration material (unburnt) 11 filter overwrap (unburnt) 12 filter adhesive (unburnt) 13 tipping paper (unburnt) 14 adhesive (unburnt) 15 cigar tips (unburnt)
12c	Category Kategorie	Category of the component or material to which the ingredient is added. The first category given should be "tobacco" and the ingredients should be given for each category by descending order of weight. For tobacco for oral use, these categories are: 16 Tobacco (unburnt) 17 pouch material
12d	Category Kategorie	Category of the component or material to which the ingredient is added. The first category given should be "tobacco" and the ingredients should be given for each category by descending order of weight. For fine-cut tobacco, pipe tobacco and water-pipe tobacco, the category is: 18 tobacco (burnt) 19 other (please specify)
13	Ingredient name Zusatzstsoff Name	Name of ingredient added to the tobacco product. Ingredients should be listed for each category (mentioned in column 12) in descending order of weight, starting with ingredients added to tobacco.

14	Ingredient quantity Zusatzstoff Menge	Exact quantity of ingredient expressed as the mean, standard deviation and 95% confidence limit of the amount of it in milligrams per one unit of product[7, 8, 9]
15	Ingredient function Zusatzstoff Funktion	Function of the ingredient. The ingredient functions are given in explanatory list A with their code and definition. The function code as given in list A should be stated here, and if an ingredient has several functions, all the function codes should be stated. Function of the ingredient. The possible ingredient functions are: 1 Addictiveness enhancer (incl. nicotine addictiveness enhancer) 2 Adhesive 3 Binder 4 Carrier 5 Colour 6 Combustion modifier 7 Fibre 8 Filler 9 Filter component 10 Filtration material 11 Flavour 12 Humectant 13 Plasticiser 14 Preservative 15 Processing aid 16 Solvent 17 Sizing agent 18 Smoke enhancer 19 Smoke colour modifier 20 Smoke odour modifier 21 Casing 22 Other

Footnotes
Fußnoten

3 Indicate here also the identity of other package sizes (containing exactly the same products); the submitted information of all of these products will be the same.

4 Some cigar packages/boxes contain more than one single product (different cigars). This must be noted in this column; information on each of the products must be submitted separately.

5 Add name and address of the laboratory in which the tests was carried out.

6 A unit of product is one cigar, one cigarette, 750mg of fine-cut tobacco, and 1 g of pipe, snuff, water-pipe, snus, or chewing tobacco.

7 A unit of product is one cigar, one cigarette, 750mg of fine-cut tobacco, and 1 g of pipe, snuff, water-pipe, snus, or chewing tobacco.

8 Industry shall inform about the change in the composition, provide the time when was the change introduced and the reasoning for the change.

9 A minimum of 6-8 measurements is recommended to get a reliable mean value.

Erklärung (D)
Name des Herstellers oder Importeurs des Tabakprodukts
Mitgliedstaat, in dem das Produkt vermarktet wird: Germany – DE Austria – AT Belgium – BE Bulgaria - BU Cyprus – CY Czech Republic – CZ Denmark – DK Estonia – EE Finland – FI France – FR Greece – EL Hungary – HU Ireland – IE Italy – IT Latvia – LV Lithuania – LT Luxembourg – LU Malta - MT Netherlands – NL Poland – PL Portugal – PT Romania - RO Slovenia – SI Slovakia – SK Spain – ES Sweden – SE United Kingdom - UK
Jahr der Übermittlung der Zusatzstoffinformationen (geben Sie den Zeitraum an z. B. 01.01.07 - 31.12.07)
Art des Tabakprodukts. Mögliche Produkttypen sind: 1 Zigarette 2 Zigarre 3 Feinschnitttabak 4 Pfeifentabak 5 Wasserpfeifentabak 6 Kautabak 7 andere Tabakprodukte (bitte angeben)
Markenname des Tabakprodukts, z.B.: Marke X Platinum oder Marke X Menthol.
Markenmerkmale des Tabakprodukts, z. B.: Packungstyp, Packungsgröße, Produktgröße, mit oder ohne Filter.[3,4]
Für Zigaretten, Messung nach ISO 3308 und ISO 43875.[5]
Für Zigaretten, Messung nach ISO 3308 und ISO 103155.[5]

Für Zigaretten, Messung nach ISO 3308 und ISO 84545.[5]
Gewicht der Produkteinheit[6], einschließlich spez. Feuchtigkeit, angegeben in mg.
Gewicht des Tabaks einer Produkteinheit, einschließlich Feuchtigkeit, angegeben in mg.
Kategorie, die den Zusatzstoff enthält. Die erste Kategorie ist Tabak, die Zusatzstoffe werden für jede Kategorie in absteigender Reihenfolge ihres Gewichtsanteils angegeben. Kategorien für Zigaretten: 1 Tabak (wird verbrannt) 2 Zigarettenpapier (wird verbrannt) 3 Nahtleim (wird verbrannt) 4 Farbstoff für Zigarettenpapier (wird verbrannt) 5 Filtermaterial (wird nicht verbrannt) 6 Filterumhüllung (wird nicht verbrannt) 7 Filterleim (wird nicht verbrannt) 8 Filterpapier und Farbstoff
Kategorie, die den Zusatzstoff enthält. Die erste Kategorie ist Tabak, die Zusatzstoffe werden für jede Kategorie in absteigender Reihenfolge ihres Gewichtsanteils angegeben. Kategorien für Zigarren: 9 Tabak (wird verbrannt) 10 Filtermaterial (wird nicht verbrannt) 11 Filterumhüllung (wird nicht verbrannt) 12 Filterleim (wird nicht verbrannt) 13 Filterpapier (wird nicht verbrannt) 14 Klebemittel (wird nicht verbrannt) 15 Zigarrenspitze (wird nicht verbrannt)
Kategorie, die den Zusatzstoff enthält. Die erste Kategorie ist Tabak, die Zusatzstoffe werden für jede Kategorie in absteigender Reihenfolge ihres Gewichtsanteils angegeben. Kategorien für Kautabak: 16 Tabak (wird nicht verbrannt) 17 Beutelmaterial
Kategorie, die den Zusatzstoff enthält. Die erste Kategorie ist Tabak, die Zusatzstoffe werden für jede Kategorie in absteigender Reihenfolge ihres Gewichtsanteils angegeben. Kategorien für Feinschnitt-, Pfeifen- und Wasserpfeifentabak: 18 Tabak (wird verbrannt) 19 anderes (bitte angeben)
Name des Zusatzstoffs - Zusatzstoffe müssen für jede Kategorie (s. Spalte 12) in absteigender Reihenfolge ihrer Gewichtsanteile, beginnend mit den Zusatzstoffen zu Tabak, angegeben werde.

Genaue Mengenangabe, angegeben mit Mittelwert, Standardabweichung, 95%-Konfidenzintervall in mg/Produkteinheit[7, 8, 9].
Funktion: Die Funktion ist in nachfolgender Liste kodiert. Geben Sie den Kode an. Hat ein Zusatzstoff mehrere Funktionen müssen alle kodiert werden. Mögliche Funktionen sind: 1 Suchtverstärker 2 Klebemittel 3 Bindemittel 4 Trägerstoff 5 Farbstoff 6 bbrennmittel 7 Faser 8 Füllstoff 9 Filterkomponente 10 Filtermaterial 11 Aroma/Geschmacksstoff 12 Feuchthaltemittel 13 Weichmacher 14 Konservierungsstoff 15 Technischer Hilfsstoff 16 Lösungsmittel 17 Klebe-, Haft- oder Verdickungsmittel 18 Rauchverstärker 19 Farbumwandler 20 Geruchsumwandler 21 Umhüllung 22 Andere

Geben Sie hier auch andere Packungsgrößen an.

Angabe , wenn Zigarrenpackung mehr als ein Produkt enthält. Übermittlung der Zusatzstoffe für jedes Produkt ist erforderlich.

Name und Adresse des Prüflabors in dem der Test durchgeführt wurde.

Produkteinheit ist: 1 Zigarre, 1 Zigarette, 750 mg Feinschnitttabak, 1 g Pfeifen-, Schnupf-, Wasserpfeifen- oder Kautabak

Produkteinheit ist: 1 Zigarre, 1 Zigarette, 750 mg Feinschnitttabak, 1 g Pfeifen-, Schnupf-, Wasserpfeifen- oder Kautabak

Änderung der Zusammensetzung ist mit dem Zeitpunkt der Änderung und Begründung anzugeben

Mindestens 6-8 Messungen sind für eine verläsliche Mittelwertberechnung empfohlen.

Explanation and structure of data on the tobacco product by brand and type of product

Column	Column title	Explanation (E)
1	Name of Manufacturer or Importer	Name of the company manufacturing or importing the tobacco product.
2	Country	Member State where the tobacco product is marketed: Germany – DE Austria – AT Belgium – BE Bulgaria - BU Cyprus – CY Czech Republic – CZ Denmark – DK Estonia – EE Finland – FI France – FR Greece – EL Hungary – HU Ireland – IE Italy – IT Latvia – LV Lithuania – LT Luxembourg – LU Malta - MT Netherlands – NL Poland – PL Portugal – PT Romania - RO Slovenia – SI Slovakia – SK Spain – ES Sweden – SE United Kingdom - UK
3	Year	Year of the submission of the ingredient information (indicate clearly specified time frame e.g. 01.01.07 – 31.12.07)
4	Product type	The type of the tobacco product. Possible product types are: 1 cigarette 2 cigar 3 fine-cut tobacco 4 pipe tobacco 5 waterpipe tobacco 6 tobacco for oral use 7 other tobacco product (please specify)
5	Brand name	Tobacco product brand name, such as for example: Brand X Platinum, or Brand X Menthol.
6	Brand Features	Tobacco product brand features, including for example the following features: pack style, pack size, tobacco product size, and filter or non-filter product.[3,4]
7	Tar yield	To be provided for cigarettes, and measured according to ISO 3308 and ISO 4387.[5]
8	Nicotine yield	To be provided for cigarettes, and measured according to ISO 3308 and ISO 10315.[5]
9	Carbon monoxide yield	To be provided for cigarettes, and measured according to ISO 3308 and ISO 8454.[5]
10	Product unit weight	Weight of one unit of product[6], including the specified pack moisture and expressed in milligrams.
11	Tobacco weight	Weight of tobacco in one unit of product[6], including the moisture content and expressed in milligrams.
12a	Category	Category of the component or material to which the ingredient is added. The first category given should be “tobacco” and the ingredients should be given for each category by descending order of weight. For cigarettes, these categories are: 1 tobacco (burnt) 2 cigarette paper (burnt) 3 sideseam adhesive (burnt) 4 inks used on cigarette paper (burnt) 5 filtration material (unburnt) 6 filter overwrap (unburnt) 7 filter adhesive (unburnt) 8 tipping paper and tipping paper inks (unburnt)
12b	Category	Category of the component or material to which the ingredient is added. The first category given should be “tobacco” and the ingredients should be given for each category by descending order of weight. For cigars, these categories are: 9 tobacco (burnt) 10 filtration material (unburnt) 11 filter overwrap (unburnt) 12 filter adhesive (unburnt) 13 tipping paper (unburnt) 14 adhesive (unburnt) 15 cigar tips (unburnt)

12c	Category	Category of the component or material to which the ingredient is added. The first category given should be “tobacco” and the ingredients should be given for each category by descending order of weight. For tobacco for oral use, these categories are: 16 Tobacco (unburnt) 17 pouch material
12d	Category	Category of the component or material to which the ingredient is added. The first category given should be “tobacco” and the ingredients should be given for each category by descending order of weight. For fine-cut tobacco, pipe tobacco and water-pipe tobacco, the category is: 18 tobacco (burnt) 19 other (please specify)
13	Ingredient name	Name of ingredient added to the tobacco product. Ingredients should be listed for each category (mentioned in column 12) in descending order of weight, starting with ingredients added to tobacco.
14	Ingredient quantity	Exact quantity of ingredient expressed as the mean, standard deviation and 95% confidence limit of the amount of it in milligrams per one unit of product[7,8,9]
15	Ingredient function	Function of the ingredient. The ingredient functions are given in explanatory list A with their code and definition. The function code as given in list A should be stated here, and if an ingredient has several functions, all the function codes should be stated. Function of the ingredient. The possible ingredient functions are: 1 Addictiveness enhancer (incl. nicotine addictiveness enhancer) 2 Adhesive 3 Binder 4 Carrier 5 Colour 6 Combustion modifier 7 Fibre 8 Filler 9 Filter component 10 Filtration material 11 Flavour 12 Humectant 13 Plasticiser 14 Preservative 15 Processing aid 16 Solvent 17 Sizing agent 18 Smoke enhancer 19 Smoke colour modifier 20 Smoke odour modifier 21 Casing 22 Other
16	Registration number	The Chemical Abstracts Service registry number used to identify the ingredient and is the preferred number to be given here. If no CAS number is available, another appropriate ingredient number should be given such as a FEMA, CoE, or FL number (see Table 3 for explanations for these numbers).
17	Ingredient toxicological data available	Please state “yes” or “no”. If “yes”, please fill in information in Table 2.

Footnotes

3 Indicate here also the identity of other package sizes (containing exactly the same products); the submitted information of all of these products will be the same.

4 Some cigar packages/boxes contain more than one single product (different cigars). This must be noted in this column; information on each of the products must be submitted separately.

5 Add name and address of the laboratory in which the tests was carried out.

6 A unit of product is one cigar, one cigarette, 750mg of fine-cut tobacco, and 1 g of pipe, snuff, water-pipe, snus, or chewing tobacco.

7 A unit of product is one cigar, one cigarette, 750mg of fine-cut tobacco, and 1 g of pipe, snuff, water-pipe, snus, or chewing tobacco.

8 Industry shall inform about the change in the composition, provide the time when was the change introduced and the reasoning for the change.

9 A minimum of 6-8 measurements is recommended to get a reliable mean value.

Column Spalte	Column title Spaltenüberschrift	Explanation (E)
1	Name of Manufacturer or Importer Name des Herstellers oder Impoteurs	Name of the company manufacturing or importing the tobacco product.
2	Country Land	Member State where the tobacco product is marketed: Germany – DE Austria – AT Belgium – BE Bulgaria - BU Cyprus – CY Czech Republic – CZ Denmark – DK Estonia – EE Finland – FI France – FR Greece – EL Hungary – HU Ireland – IE Italy – IT Latvia – LV Lithuania – LT Luxembourg – LU Malta - MT Netherlands – NL Poland – PL Portugal – PT Romania - RO Slovenia – SI Slovakia – SK Spain – ES Sweden – SE United Kingdom - UK
3	Year Jahr	Year of the submission of the ingredient information (indicate clearly specified time frame e.g. 01.01.07 – 31.12.07)
4	Product type Produkttyp	The type of the tobacco product. Possible product types are: 1 cigarette 2 cigar 3 fine-cut tobacco 4 pipe tobacco 5 waterpipe tobacco 6 tobacco for oral use 7 other tobacco product (please specify)
5	Brand name Markennname	Tobacco product brand name, such as for example: Brand X Platinum, or Brand X Menthol.
6	Brand Features Marken-Merkmal	Tobacco product brand features, including for example the following features: pack style, pack size, tobacco product size, and filter or non-filter product.[3,4]
7	Tar yield Teergehalt	To be provided for cigarettes, and measured according to ISO 3308 and ISO 4387.[5]
8	Nicotine yield Nikotingehalt	To be provided for cigarettes, and measured according to ISO 3308 and ISO 10315.[5]

9	Carbon monoxide yield Kohlenmonoxid-Gehalt	To be provided for cigarettes, and measured according to ISO 3308 and ISO 8454.[5]
10	Product unit weight Gewicht Produkteinheit	Weight of one unit of product[6], including the specified pack moisture and expressed in milligrams.
11	Tobacco weight Gewicht Tabak	Weight of tobacco in one unit of product[6], including the moisture content and expressed in milligrams.
12a	Category Kategorie	Category of the component or material to which the ingredient is added. The first category given should be "tobacco" and the ingredients should be given for each category by descending order of weight. For cigarettes, these categories are: 1 tobacco (burnt) 2 cigarette paper (burnt) 3 sideseam adhesive (burnt) 4 inks used on cigarette paper (burnt) 5 filtration material (unburnt) 6 filter overwrap (unburnt) 7 filter adhesive (unburnt) 8 tipping paper and tipping paper inks (unburnt)
12b	Category Kategorie	Category of the component or material to which the ingredient is added. The first category given should be "tobacco" and the ingredients should be given for each category by descending order of weight. For cigars, these categories are: 9 tobacco (burnt) 10 filtration material (unburnt) 11 filter overwrap (unburnt) 12 filter adhesive (unburnt) 13 tipping paper (unburnt) 14 adhesive (unburnt) 15 cigar tips (unburnt)
12c	Category Kategorie	Category of the component or material to which the ingredient is added. The first category given should be "tobacco" and the ingredients should be given for each category by descending order of weight. For tobacco for oral use, these categories are: 16 Tobacco (unburnt) 17 pouch material
12d	Category Kategorie	Category of the component or material to which the ingredient is added. The first category given should be "tobacco" and the ingredients should be given for each category by descending order of weight. For fine-cut tobacco, pipe tobacco and water-pipe tobacco, the category is: 18 tobacco (burnt) 19 other (please specify)
13	Ingredient name Zusatzstsoff Name	Name of ingredient added to the tobacco product. Ingredients should be listed for each category (mentioned in column 12) in descending order of weight, starting with ingredients added to tobacco.

14	Ingredient quantity Zusatzstoff Menge	Exact quantity of ingredient expressed as the mean, standard deviation and 95% confidence limit of the amount of it in milligrams per one unit of product[7, 8, 9]
15	Ingredient function Zusatzstoff Funktion	Function of the ingredient. The ingredient functions are given in explanatory list A with their code and definition. The function code as given in list A should be stated here, and if an ingredient has several functions, all the function codes should be stated. Function of the ingredient. The possible ingredient functions are: 1 Addictiveness enhancer (incl. nicotine addictiveness enhancer) 2 Adhesive 3 Binder 4 Carrier 5 Colour 6 Combustion modifier 7 Fibre 8 Filler 9 Filter component 10 Filtration material 11 Flavour 12 Humectant 13 Plasticiser 14 Preservative 15 Processing aid 16 Solvent 17 Sizing agent 18 Smoke enhancer 19 Smoke colour modifier 20 Smoke odour modifier 21 Casing 22 Other

Footnotes
Fußnoten

3 Indicate here also the identity of other package sizes (containing exactly the same products); the submitted information of all of these products will be the same.

4 Some cigar packages/boxes contain more than one single product (different cigars). This must be noted in this column; information on each of the products must be submitted separately.

5 Add name and address of the laboratory in which the tests was carried out.

6 A unit of product is one cigar, one cigarette, 750mg of fine-cut tobacco, and 1 g of pipe, snuff, water-pipe, snus, or chewing tobacco.

7 A unit of product is one cigar, one cigarette, 750mg of fine-cut tobacco, and 1 g of pipe, snuff, water-pipe, snus, or chewing tobacco.

8 Industry shall inform about the change in the composition, provide the time when was the change introduced and the reasoning for the change.

9 A minimum of 6-8 measurements is recommended to get a reliable mean value.

Erklärung (D)
Name des Herstellers oder Importeurs des Tabakprodukts
Mitgliedstaat, in dem das Produkt vermarktet wird: Germany – DE Austria – AT Belgium – BE Bulgaria - BU Cyprus – CY Czech Republic – CZ Denmark – DK Estonia – EE Finland – FI France – FR Greece – EL Hungary – HU Ireland – IE Italy – IT Latvia – LV Lithuania – LT Luxembourg – LU Malta - MT Netherlands – NL Poland – PL Portugal – PT Romania - RO Slovenia – SI Slovakia – SK Spain – ES Sweden – SE United Kingdom - UK
Jahr der Übermittlung der Zusatzstoffinformationen (geben Sie den Zeitraum an z. B. 01.01.07 - 31.12.07)
Art des Tabakprodukts. Mögliche Produkttypen sind: 1 Zigarette 2 Zigarre 3 Feinschnitttabak 4 Pfeifentabak 5 Wasserpfeifentabak 6 Kautabak 7 andere Tabakprodukte (bitte angeben)
Markenname des Tabakprodukts, z.B.: Marke X Platinum oder Marke X Menthol.
Markenmerkmale des Tabakprodukts, z. B.: Packungstyp, Packungsgröße, Produktgröße, mit oder ohne Filter.[3,4]
Für Zigaretten, Messung nach ISO 3308 und ISO 43875.[5]
Für Zigaretten, Messung nach ISO 3308 und ISO 103155.[5]

Für Zigaretten, Messung nach ISO 3308 und ISO 84545.[5]
Gewicht der Produkteinheit[6], einschließlich spez. Feuchtigkeit, angegeben in mg.
Gewicht des Tabaks einer Produkteinheit, einschließlich Feuchtigkeit, angegeben in mg.
Kategorie, die den Zusatzstoff enthält. Die erste Kategorie ist Tabak, die Zusatzstoffe werden für jede Kategorie in absteigender Reihenfolge ihres Gewichtsanteils angegeben. Kategorien für Zigaretten: 1 Tabak (wird verbrannt) 2 Zigarettenpapier (wird verbrannt) 3 Nahtleim (wird verbrannt) 4 Farbstoff für Zigarettenpapier (wird verbrannt) 5 Filtermaterial (wird nicht verbrannt) 6 Filterumhüllung (wird nicht verbrannt) 7 Filterleim (wird nicht verbrannt) 8 Filterpapier und Farbstoff
Kategorie, die den Zusatzstoff enthält. Die erste Kategorie ist Tabak, die Zusatzstoffe werden für jede Kategorie in absteigender Reihenfolge ihres Gewichtsanteils angegeben. Kategorien für Zigarren: 9 Tabak (wird verbrannt) 10 Filtermaterial (wird nicht verbrannt) 11 Filterumhüllung (wird nicht verbrannt) 12 Filterleim (wird nicht verbrannt) 13 Filterpapier (wird nicht verbrannt) 14 Klebemittel (wird nicht verbrannt) 15 Zigarrenspitze (wird nicht verbrannt)
Kategorie, die den Zusatzstoff enthält. Die erste Kategorie ist Tabak, die Zusatzstoffe werden für jede Kategorie in absteigender Reihenfolge ihres Gewichtsanteils angegeben. Kategorien für Kautabak: 16 Tabak (wird nicht verbrannt) 17 Beutelmaterial
Kategorie, die den Zusatzstoff enthält. Die erste Kategorie ist Tabak, die Zusatzstoffe werden für jede Kategorie in absteigender Reihenfolge ihres Gewichtsanteils angegeben. Kategorien für Feinschnitt-, Pfeifen- und Wasserpfeifentabak: 18 Tabak (wird verbrannt) 19 anderes (bitte angeben)
Name des Zusatzstoffs - Zusatzstoffe müssen für jede Kategorie (s. Spalte 12) in absteigender Reihenfolge ihrer Gewichtsanteile, beginnend mit den Zusatzstoffen zu Tabak, angegeben werde.

Genaue Mengenangabe, angegeben mit Mittelwert, Standardabweichung, 95%-Konfidenzintervall in mg/Produkteinheit[7, 8, 9].
Funktion: Die Funktion ist in nachfolgender Liste kodiert. Geben Sie den Kode an. Hat ein Zusatzstoff mehrere Funktionen müssen alle kodiert werden. Mögliche Funktionen sind: 1 Suchtverstärker 2 Klebemittel 3 Bindemittel 4 Trägerstoff 5 Farbstoff 6 bbrennmittel 7 Faser 8 Füllstoff 9 Filterkomponente 10 Filtermaterial 11 Aroma/Geschmacksstoff 12 Feuchthaltemittel 13 Weichmacher 14 Konservierungsstoff 15 Technischer Hilfsstoff 16 Lösungsmittel 17 Klebe-, Haft- oder Verdickungsmittel 18 Rauchverstärker 19 Farbumwandler 20 Geruchsumwandler 21 Umhüllung 22 Andere

Geben Sie hier auch andere Packungsgrößen an.

Angabe , wenn Zigarrenpackung mehr als ein Produkt enthält. Übermittlung der Zusatzstoffe für jedes Produkt ist erforderlich.

Name und Adresse des Prüflabors in dem der Test durchgeführt wurde.

Produkteinheit ist: 1 Zigarre, 1 Zigarette, 750 mg Feinschnitttabak, 1 g Pfeifen-, Schnupf-, Wasserpfeifen- oder Kautabak

Produkteinheit ist: 1 Zigarre, 1 Zigarette, 750 mg Feinschnitttabak, 1 g Pfeifen-, Schnupf-, Wasserpfeifen- oder Kautabak

Änderung der Zusammensetzung ist mit dem Zeitpunkt der Änderung und Begründung anzugeben

Mindestens 6-8 Messungen sind für eine verläsliche Mittelwertberechnung empfohlen.

List to regulators of all ingredients in the tobacco product with exact quantities, by brand and type of product

Explanation and structure of data on the tobacco product by brand and type of product

Column	Column title	Explanation (E)
1	Name of Manufacturer or Importer	Name of the company manufacturing or importing the tobacco product.
2	Country	Member State where the tobacco product is marketed: Germany – DE Austria – AT Belgium – BE Bulgaria - BU Cyprus – CY Czech Republic – CZ Denmark – DK Estonia – EE Finland – FI France – FR Greece – EL Hungary – HU Ireland – IE Italy – IT Latvia – LV Lithuania – LT Luxembourg – LU Malta - MT Netherlands – NL Poland – PL Portugal – PT Romania - RO Slovenia – SI Slovakia – SK Spain – ES Sweden – SE United Kingdom - UK
3	Year	Year of the submission of the ingredient information (indicate clearly specified time frame e.g. 01.01.07 – 31.12.07)
4	Product type	The type of the tobacco product. Possible product types are: 1 cigarette 2 cigar 3 fine-cut tobacco 4 pipe tobacco 5 waterpipe tobacco 6 tobacco for oral use 7 other tobacco product (please specify)
5	Brand name	Tobacco product brand name, such as for example: Brand X Platinum, or Brand X Menthol.
6	Brand Features	Tobacco product brand features, including for example the following features: pack style, pack size, tobacco product size, and filter or non-filter product.[3,4]
7	Tar yield	To be provided for cigarettes, and measured according to ISO 3308 and ISO 4387.[5]
8	Nicotine yield	To be provided for cigarettes, and measured according to ISO 3308 and ISO 10315.[5]
9	Carbon monoxide yield	To be provided for cigarettes, and measured according to ISO 3308 and ISO 8454.[5]
10	Product unit weight	Weight of one unit of product[6], including the specified pack moisture and expressed in milligrams.
11	Tobacco weight	Weight of tobacco in one unit of product[6], including the moisture content and expressed in milligrams.
12a	Category	Category of the component or material to which the ingredient is added. The first category given should be “tobacco” and the ingredients should be given for each category by descending order of weight. For cigarettes, these categories are: 1 tobacco (burnt) 2 cigarette paper (burnt) 3 sideseam adhesive (burnt) 4 inks used on cigarette paper (burnt) 5 filtration material (unburnt) 6 filter overwrap (unburnt) 7 filter adhesive (unburnt) 8 tipping paper and tipping paper inks (unburnt)
12b	Category	Category of the component or material to which the ingredient is added. The first category given should be “tobacco” and the ingredients should be given for each category by descending order of weight. For cigars, these categories are: 9 tobacco (burnt) 10 filtration material (unburnt) 11 filter overwrap (unburnt) 12 filter adhesive (unburnt) 13 tipping paper (unburnt) 14 adhesive (unburnt) 15 cigar tips (unburnt)

12c	Category	Category of the component or material to which the ingredient is added. The first category given should be “tobacco” and the ingredients should be given for each category by descending order of weight. For tobacco for oral use, these categories are: 16 Tobacco (unburnt) 17 pouch material
12d	Category	Category of the component or material to which the ingredient is added. The first category given should be “tobacco” and the ingredients should be given for each category by descending order of weight. For fine-cut tobacco, pipe tobacco and water-pipe tobacco, the category is: 18 tobacco (burnt) 19 other (please specify)
13	Ingredient name	Name of ingredient added to the tobacco product. Ingredients should be listed for each category (mentioned in column 12) in descending order of weight, starting with ingredients added to tobacco.
14	Ingredient quantity	Exact quantity of ingredient expressed as the mean, standard deviation and 95% confidence limit of the amount of it in milligrams per one unit of product[7,8,9]
15	Ingredient function	Function of the ingredient. The ingredient functions are given in explanatory list A with their code and definition. The function code as given in list A should be stated here, and if an ingredient has several functions, all the function codes should be stated. Function of the ingredient. The possible ingredient functions are: 1 Addictiveness enhancer (incl. nicotine addictiveness enhancer) 2 Adhesive 3 Binder 4 Carrier 5 Colour 6 Combustion modifier 7 Fibre 8 Filler 9 Filter component 10 Filtration material 11 Flavour 12 Humectant 13 Plasticiser 14 Preservative 15 Processing aid 16 Solvent 17 Sizing agent 18 Smoke enhancer 19 Smoke colour modifier 20 Smoke odour modifier 21 Casing 22 Other
16	Registration number	The Chemical Abstracts Service registry number used to identify the ingredient and is the preferred number to be given here. If no CAS number is available, another appropriate ingredient number should be given such as a FEMA, CoE, or FL number (see Table 3 for explanations for these numbers).
17	Ingredient toxicological data available	Please state “yes” or “no”. If “yes”, please fill in information in Table 2.

Footnotes

3 Indicate here also the identity of other package sizes (containing exactly the same products); the submitted information of all of these products will be the same.

4 Some cigar packages/boxes contain more than one single product (different cigars). This must be noted in this column; information on each of the products must be submitted separately.

5 Add name and address of the laboratory in which the tests was carried out.

6 A unit of product is one cigar, one cigarette, 750mg of fine-cut tobacco, and 1 g of pipe, snuff, water-pipe, snus, or chewing tobacco.

7 A unit of product is one cigar, one cigarette, 750mg of fine-cut tobacco, and 1 g of pipe, snuff, water-pipe, snus, or chewing tobacco.

8 Industry shall inform about the change in the composition, provide the time when was the change introduced and the reasoning for the change.

9 A minimum of 6-8 measurements is recommended to get a reliable mean value.

Explanation and structure of data on the tobacco product by brand and type of product

Column	Column title	Explanation (E)
1	Name of Manufacturer or Importer	Name of the company manufacturing or importing the tobacco product.
2	Country	Member State where the tobacco product is marketed: Germany – DE Austria – AT Belgium – BE Bulgaria - BU Cyprus – CY Czech Republic – CZ Denmark – DK Estonia – EE Finland – FI France – FR Greece – EL Hungary – HU Ireland – IE Italy – IT Latvia – LV Lithuania – LT Luxembourg – LU Malta - MT Netherlands – NL Poland – PL Portugal – PT Romania - RO Slovenia – SI Slovakia – SK Spain – ES Sweden – SE United Kingdom - UK
3	Year	Year of the submission of the ingredient information (indicate clearly specified time frame e.g. 01.01.07 – 31.12.07)
4	Product type	The type of the tobacco product. Possible product types are: 1 cigarette 2 cigar 3 fine-cut tobacco 4 pipe tobacco 5 waterpipe tobacco 6 tobacco for oral use 7 other tobacco product (please specify)
5	Brand name	Tobacco product brand name, such as for example: Brand X Platinum, or Brand X Menthol.
6	Brand Features	Tobacco product brand features, including for example the following features: pack style, pack size, tobacco product size, and filter or non-filter product.[3,4]
7	Tar yield	To be provided for cigarettes, and measured according to ISO 3308 and ISO 4387.[5]
8	Nicotine yield	To be provided for cigarettes, and measured according to ISO 3308 and ISO 10315.[5]
9	Carbon monoxide yield	To be provided for cigarettes, and measured according to ISO 3308 and ISO 8454.[5]
10	Product unit weight	Weight of one unit of product[6], including the specified pack moisture and expressed in milligrams.
11	Tobacco weight	Weight of tobacco in one unit of product[6], including the moisture content and expressed in milligrams.
12a	Category	Category of the component or material to which the ingredient is added. The first category given should be “tobacco” and the ingredients should be given for each category by descending order of weight. For cigarettes, these categories are: 1 tobacco (burnt) 2 cigarette paper (burnt) 3 sideseam adhesive (burnt) 4 inks used on cigarette paper (burnt) 5 filtration material (unburnt) 6 filter overwrap (unburnt) 7 filter adhesive (unburnt) 8 tipping paper and tipping paper inks (unburnt)
12b	Category	Category of the component or material to which the ingredient is added. The first category given should be “tobacco” and the ingredients should be given for each category by descending order of weight. For cigars, these categories are: 9 tobacco (burnt) 10 filtration material (unburnt) 11 filter overwrap (unburnt) 12 filter adhesive (unburnt) 13 tipping paper (unburnt) 14 adhesive (unburnt) 15 cigar tips (unburnt)

12c	Category	Category of the component or material to which the ingredient is added. The first category given should be “tobacco” and the ingredients should be given for each category by descending order of weight. For tobacco for oral use, these categories are: 16 Tobacco (unburnt) 17 pouch material
12d	Category	Category of the component or material to which the ingredient is added. The first category given should be “tobacco” and the ingredients should be given for each category by descending order of weight. For fine-cut tobacco, pipe tobacco and water-pipe tobacco, the category is: 18 tobacco (burnt) 19 other (please specify)
13	Ingredient name	Name of ingredient added to the tobacco product. Ingredients should be listed for each category (mentioned in column 12) in descending order of weight, starting with ingredients added to tobacco.
14	Ingredient quantity	Exact quantity of ingredient expressed as the mean, standard deviation and 95% confidence limit of the amount of it in milligrams per one unit of product[7,8,9]
15	Ingredient function	Function of the ingredient. The ingredient functions are given in explanatory list A with their code and definition. The function code as given in list A should be stated here, and if an ingredient has several functions, all the function codes should be stated. Function of the ingredient. The possible ingredient functions are: 1 Addictiveness enhancer (incl. nicotine addictiveness enhancer) 2 Adhesive 3 Binder 4 Carrier 5 Colour 6 Combustion modifier 7 Fibre 8 Filler 9 Filter component 10 Filtration material 11 Flavour 12 Humectant 13 Plasticiser 14 Preservative 15 Processing aid 16 Solvent 17 Sizing agent 18 Smoke enhancer 19 Smoke colour modifier 20 Smoke odour modifier 21 Casing 22 Other
16	Registration number	The Chemical Abstracts Service registry number used to identify the ingredient and is the preferred number to be given here. If no CAS number is available, another appropriate ingredient number should be given such as a FEMA, CoE, or FL number (see Table 3 for explanations for these numbers).
17	Ingredient toxicological data available	Please state “yes” or “no”. If “yes”, please fill in information in Table 2.

Footnotes

3 Indicate here also the identity of other package sizes (containing exactly the same products); the submitted information of all of these products will be the same.

4 Some cigar packages/boxes contain more than one single product (different cigars). This must be noted in this column; information on each of the products must be submitted separately.

5 Add name and address of the laboratory in which the tests was carried out.

6 A unit of product is one cigar, one cigarette, 750mg of fine-cut tobacco, and 1 g of pipe, snuff, water-pipe, snus, or chewing tobacco.

7 A unit of product is one cigar, one cigarette, 750mg of fine-cut tobacco, and 1 g of pipe, snuff, water-pipe, snus, or chewing tobacco.

8 Industry shall inform about the change in the composition, provide the time when was the change introduced and the reasoning for the change.

9 A minimum of 6-8 measurements is recommended to get a reliable mean value.

Explanation and structure of data on the tobacco product by brand and type of product

Column	Column title	Explanation (E)
1	Name of Manufacturer or Importer	Name of the company manufacturing or importing the tobacco product.
2	Country	Member State where the tobacco product is marketed: Germany – DE Austria – AT Belgium – BE Bulgaria - BU Cyprus – CY Czech Republic – CZ Denmark – DK Estonia – EE Finland – FI France – FR Greece – EL Hungary – HU Ireland – IE Italy – IT Latvia – LV Lithuania – LT Luxembourg – LU Malta - MT Netherlands – NL Poland – PL Portugal – PT Romania - RO Slovenia – SI Slovakia – SK Spain – ES Sweden – SE United Kingdom - UK
3	Year	Year of the submission of the ingredient information (indicate clearly specified time frame e.g. 01.01.07 – 31.12.07)
4	Product type	The type of the tobacco product. Possible product types are: 1 cigarette 2 cigar 3 fine-cut tobacco 4 pipe tobacco 5 waterpipe tobacco 6 tobacco for oral use 7 other tobacco product (please specify)
5	Brand name	Tobacco product brand name, such as for example: Brand X Platinum, or Brand X Menthol.
6	Brand Features	Tobacco product brand features, including for example the following features: pack style, pack size, tobacco product size, and filter or non-filter product.[3,4]
7	Tar yield	To be provided for cigarettes, and measured according to ISO 3308 and ISO 4387.[5]
8	Nicotine yield	To be provided for cigarettes, and measured according to ISO 3308 and ISO 10315.[5]
9	Carbon monoxide yield	To be provided for cigarettes, and measured according to ISO 3308 and ISO 8454.[5]
10	Product unit weight	Weight of one unit of product[6], including the specified pack moisture and expressed in milligrams.
11	Tobacco weight	Weight of tobacco in one unit of product[6], including the moisture content and expressed in milligrams.
12a	Category	Category of the component or material to which the ingredient is added. The first category given should be “tobacco” and the ingredients should be given for each category by descending order of weight. For cigarettes, these categories are: 1 tobacco (burnt) 2 cigarette paper (burnt) 3 sideseam adhesive (burnt) 4 inks used on cigarette paper (burnt) 5 filtration material (unburnt) 6 filter overwrap (unburnt) 7 filter adhesive (unburnt) 8 tipping paper and tipping paper inks (unburnt)
12b	Category	Category of the component or material to which the ingredient is added. The first category given should be “tobacco” and the ingredients should be given for each category by descending order of weight. For cigars, these categories are: 9 tobacco (burnt) 10 filtration material (unburnt) 11 filter overwrap (unburnt) 12 filter adhesive (unburnt) 13 tipping paper (unburnt) 14 adhesive (unburnt) 15 cigar tips (unburnt)

12c	Category	Category of the component or material to which the ingredient is added. The first category given should be “tobacco” and the ingredients should be given for each category by descending order of weight. For tobacco for oral use, these categories are: 16 Tobacco (unburnt) 17 pouch material
12d	Category	Category of the component or material to which the ingredient is added. The first category given should be “tobacco” and the ingredients should be given for each category by descending order of weight. For fine-cut tobacco, pipe tobacco and water-pipe tobacco, the category is: 18 tobacco (burnt) 19 other (please specify)
13	Ingredient name	Name of ingredient added to the tobacco product. Ingredients should be listed for each category (mentioned in column 12) in descending order of weight, starting with ingredients added to tobacco.
14	Ingredient quantity	Exact quantity of ingredient expressed as the mean, standard deviation and 95% confidence limit of the amount of it in milligrams per one unit of product[7,8,9]
15	Ingredient function	Function of the ingredient. The ingredient functions are given in explanatory list A with their code and definition. The function code as given in list A should be stated here, and if an ingredient has several functions, all the function codes should be stated. Function of the ingredient. The possible ingredient functions are: 1 Addictiveness enhancer (incl. nicotine addictiveness enhancer) 2 Adhesive 3 Binder 4 Carrier 5 Colour 6 Combustion modifier 7 Fibre 8 Filler 9 Filter component 10 Filtration material 11 Flavour 12 Humectant 13 Plasticiser 14 Preservative 15 Processing aid 16 Solvent 17 Sizing agent 18 Smoke enhancer 19 Smoke colour modifier 20 Smoke odour modifier 21 Casing 22 Other
16	Registration number	The Chemical Abstracts Service registry number used to identify the ingredient and is the preferred number to be given here. If no CAS number is available, another appropriate ingredient number should be given such as a FEMA, CoE, or FL number (see Table 3 for explanations for these numbers).
17	Ingredient toxicological data available	Please state “yes” or “no”. If “yes”, please fill in information in Table 2.

Footnotes

3 Indicate here also the identity of other package sizes (containing exactly the same products); the submitted information of all of these products will be the same.

4 Some cigar packages/boxes contain more than one single product (different cigars). This must be noted in this column; information on each of the products must be submitted separately.

5 Add name and address of the laboratory in which the tests was carried out.

6 A unit of product is one cigar, one cigarette, 750mg of fine-cut tobacco, and 1 g of pipe, snuff, water-pipe, snus, or chewing tobacco.

7 A unit of product is one cigar, one cigarette, 750mg of fine-cut tobacco, and 1 g of pipe, snuff, water-pipe, snus, or chewing tobacco.

8 Industry shall inform about the change in the composition, provide the time when was the change introduced and the reasoning for the change.

9 A minimum of 6-8 measurements is recommended to get a reliable mean value.

Explanation and structure of data on the tobacco product by brand and type of product

Column	Column title	Explanation (E)
1	Name of Manufacturer or Importer	Name of the company manufacturing or importing the tobacco product.
2	Country	Member State where the tobacco product is marketed: Germany – DE Austria – AT Belgium – BE Bulgaria - BU Cyprus – CY Czech Republic – CZ Denmark – DK Estonia – EE Finland – FI France – FR Greece – EL Hungary – HU Ireland – IE Italy – IT Latvia – LV Lithuania – LT Luxembourg – LU Malta - MT Netherlands – NL Poland – PL Portugal – PT Romania - RO Slovenia – SI Slovakia – SK Spain – ES Sweden – SE United Kingdom - UK
3	Year	Year of the submission of the ingredient information (indicate clearly specified time frame e.g. 01.01.07 – 31.12.07)
4	Product type	The type of the tobacco product. Possible product types are: 1 cigarette 2 cigar 3 fine-cut tobacco 4 pipe tobacco 5 waterpipe tobacco 6 tobacco for oral use 7 other tobacco product (please specify)
5	Brand name	Tobacco product brand name, such as for example: Brand X Platinum, or Brand X Menthol.
6	Brand Features	Tobacco product brand features, including for example the following features: pack style, pack size, tobacco product size, and filter or non-filter product.[3,4]
7	Tar yield	To be provided for cigarettes, and measured according to ISO 3308 and ISO 4387.[5]
8	Nicotine yield	To be provided for cigarettes, and measured according to ISO 3308 and ISO 10315.[5]
9	Carbon monoxide yield	To be provided for cigarettes, and measured according to ISO 3308 and ISO 8454.[5]
10	Product unit weight	Weight of one unit of product[6], including the specified pack moisture and expressed in milligrams.
11	Tobacco weight	Weight of tobacco in one unit of product[6], including the moisture content and expressed in milligrams.
12a	Category	Category of the component or material to which the ingredient is added. The first category given should be “tobacco” and the ingredients should be given for each category by descending order of weight. For cigarettes, these categories are: 1 tobacco (burnt) 2 cigarette paper (burnt) 3 sideseam adhesive (burnt) 4 inks used on cigarette paper (burnt) 5 filtration material (unburnt) 6 filter overwrap (unburnt) 7 filter adhesive (unburnt) 8 tipping paper and tipping paper inks (unburnt)
12b	Category	Category of the component or material to which the ingredient is added. The first category given should be “tobacco” and the ingredients should be given for each category by descending order of weight. For cigars, these categories are: 9 tobacco (burnt) 10 filtration material (unburnt) 11 filter overwrap (unburnt) 12 filter adhesive (unburnt) 13 tipping paper (unburnt) 14 adhesive (unburnt) 15 cigar tips (unburnt)

12c	Category	Category of the component or material to which the ingredient is added. The first category given should be “tobacco” and the ingredients should be given for each category by descending order of weight. For tobacco for oral use, these categories are: 16 Tobacco (unburnt) 17 pouch material
12d	Category	Category of the component or material to which the ingredient is added. The first category given should be “tobacco” and the ingredients should be given for each category by descending order of weight. For fine-cut tobacco, pipe tobacco and water-pipe tobacco, the category is: 18 tobacco (burnt) 19 other (please specify)
13	Ingredient name	Name of ingredient added to the tobacco product. Ingredients should be listed for each category (mentioned in column 12) in descending order of weight, starting with ingredients added to tobacco.
14	Ingredient quantity	Exact quantity of ingredient expressed as the mean, standard deviation and 95% confidence limit of the amount of it in milligrams per one unit of product[7,8,9]
15	Ingredient function	Function of the ingredient. The ingredient functions are given in explanatory list A with their code and definition. The function code as given in list A should be stated here, and if an ingredient has several functions, all the function codes should be stated. Function of the ingredient. The possible ingredient functions are: 1 Addictiveness enhancer (incl. nicotine addictiveness enhancer) 2 Adhesive 3 Binder 4 Carrier 5 Colour 6 Combustion modifier 7 Fibre 8 Filler 9 Filter component 10 Filtration material 11 Flavour 12 Humectant 13 Plasticiser 14 Preservative 15 Processing aid 16 Solvent 17 Sizing agent 18 Smoke enhancer 19 Smoke colour modifier 20 Smoke odour modifier 21 Casing 22 Other
16	Registration number	The Chemical Abstracts Service registry number used to identify the ingredient and is the preferred number to be given here. If no CAS number is available, another appropriate ingredient number should be given such as a FEMA, CoE, or FL number (see Table 3 for explanations for these numbers).
17	Ingredient toxicological data available	Please state “yes” or “no”. If “yes”, please fill in information in Table 2.

Footnotes

3 Indicate here also the identity of other package sizes (containing exactly the same products); the submitted information of all of these products will be the same.

4 Some cigar packages/boxes contain more than one single product (different cigars). This must be noted in this column; information on each of the products must be submitted separately.

5 Add name and address of the laboratory in which the tests was carried out.

6 A unit of product is one cigar, one cigarette, 750mg of fine-cut tobacco, and 1 g of pipe, snuff, water-pipe, snus, or chewing tobacco.

7 A unit of product is one cigar, one cigarette, 750mg of fine-cut tobacco, and 1 g of pipe, snuff, water-pipe, snus, or chewing tobacco.

8 Industry shall inform about the change in the composition, provide the time when was the change introduced and the reasoning for the change.

9 A minimum of 6-8 measurements is recommended to get a reliable mean value.

Explanation and structure of data on the tobacco product by brand and type of product

Column	Column title	Explanation (E)
1	Name of Manufacturer or Importer	Name of the company manufacturing or importing the tobacco product.
2	Country	Member State where the tobacco product is marketed: Germany – DE Austria – AT Belgium – BE Bulgaria - BU Cyprus – CY Czech Republic – CZ Denmark – DK Estonia – EE Finland – FI France – FR Greece – EL Hungary – HU Ireland – IE Italy – IT Latvia – LV Lithuania – LT Luxembourg – LU Malta - MT Netherlands – NL Poland – PL Portugal – PT Romania - RO Slovenia – SI Slovakia – SK Spain – ES Sweden – SE United Kingdom - UK
3	Year	Year of the submission of the ingredient information (indicate clearly specified time frame e.g. 01.01.07 – 31.12.07)
4	Product type	The type of the tobacco product. Possible product types are: 1 cigarette 2 cigar 3 fine-cut tobacco 4 pipe tobacco 5 waterpipe tobacco 6 tobacco for oral use 7 other tobacco product (please specify)
5	Brand name	Tobacco product brand name, such as for example: Brand X Platinum, or Brand X Menthol.
6	Brand Features	Tobacco product brand features, including for example the following features: pack style, pack size, tobacco product size, and filter or non-filter product.[3,4]
7	Tar yield	To be provided for cigarettes, and measured according to ISO 3308 and ISO 4387.[5]
8	Nicotine yield	To be provided for cigarettes, and measured according to ISO 3308 and ISO 10315.[5]
9	Carbon monoxide yield	To be provided for cigarettes, and measured according to ISO 3308 and ISO 8454.[5]
10	Product unit weight	Weight of one unit of product[6], including the specified pack moisture and expressed in milligrams.
11	Tobacco weight	Weight of tobacco in one unit of product[6], including the moisture content and expressed in milligrams.
12a	Category	Category of the component or material to which the ingredient is added. The first category given should be “tobacco” and the ingredients should be given for each category by descending order of weight. For cigarettes, these categories are: 1 tobacco (burnt) 2 cigarette paper (burnt) 3 sideseam adhesive (burnt) 4 inks used on cigarette paper (burnt) 5 filtration material (unburnt) 6 filter overwrap (unburnt) 7 filter adhesive (unburnt) 8 tipping paper and tipping paper inks (unburnt)
12b	Category	Category of the component or material to which the ingredient is added. The first category given should be “tobacco” and the ingredients should be given for each category by descending order of weight. For cigars, these categories are: 9 tobacco (burnt) 10 filtration material (unburnt) 11 filter overwrap (unburnt) 12 filter adhesive (unburnt) 13 tipping paper (unburnt) 14 adhesive (unburnt) 15 cigar tips (unburnt)

12c	Category	Category of the component or material to which the ingredient is added. The first category given should be “tobacco” and the ingredients should be given for each category by descending order of weight. For tobacco for oral use, these categories are: 16 Tobacco (unburnt) 17 pouch material
12d	Category	Category of the component or material to which the ingredient is added. The first category given should be “tobacco” and the ingredients should be given for each category by descending order of weight. For fine-cut tobacco, pipe tobacco and water-pipe tobacco, the category is: 18 tobacco (burnt) 19 other (please specify)
13	Ingredient name	Name of ingredient added to the tobacco product. Ingredients should be listed for each category (mentioned in column 12) in descending order of weight, starting with ingredients added to tobacco.
14	Ingredient quantity	Exact quantity of ingredient expressed as the mean, standard deviation and 95% confidence limit of the amount of it in milligrams per one unit of product[7,8,9]
15	Ingredient function	Function of the ingredient. The ingredient functions are given in explanatory list A with their code and definition. The function code as given in list A should be stated here, and if an ingredient has several functions, all the function codes should be stated. Function of the ingredient. The possible ingredient functions are: 1 Addictiveness enhancer (incl. nicotine addictiveness enhancer) 2 Adhesive 3 Binder 4 Carrier 5 Colour 6 Combustion modifier 7 Fibre 8 Filler 9 Filter component 10 Filtration material 11 Flavour 12 Humectant 13 Plasticiser 14 Preservative 15 Processing aid 16 Solvent 17 Sizing agent 18 Smoke enhancer 19 Smoke colour modifier 20 Smoke odour modifier 21 Casing 22 Other
16	Registration number	The Chemical Abstracts Service registry number used to identify the ingredient and is the preferred number to be given here. If no CAS number is available, another appropriate ingredient number should be given such as a FEMA, CoE, or FL number (see Table 3 for explanations for these numbers).
17	Ingredient toxicological data available	Please state “yes” or “no”. If “yes”, please fill in information in Table 2.

Footnotes

3 Indicate here also the identity of other package sizes (containing exactly the same products); the submitted information of all of these products will be the same.

4 Some cigar packages/boxes contain more than one single product (different cigars). This must be noted in this column; information on each of the products must be submitted separately.

5 Add name and address of the laboratory in which the tests was carried out.

6 A unit of product is one cigar, one cigarette, 750mg of fine-cut tobacco, and 1 g of pipe, snuff, water-pipe, snus, or chewing tobacco.

7 A unit of product is one cigar, one cigarette, 750mg of fine-cut tobacco, and 1 g of pipe, snuff, water-pipe, snus, or chewing tobacco.

8 Industry shall inform about the change in the composition, provide the time when was the change introduced and the reasoning for the change.

9 A minimum of 6-8 measurements is recommended to get a reliable mean value.

Explanation and structure of data on the tobacco product by brand and type of product

Column	Column title	Explanation (E)
1	Name of Manufacturer or Importer	Name of the company manufacturing or importing the tobacco product.
2	Country	Member State where the tobacco product is marketed: Germany – DE Austria – AT Belgium – BE Bulgaria - BU Cyprus – CY Czech Republic – CZ Denmark – DK Estonia – EE Finland – FI France – FR Greece – EL Hungary – HU Ireland – IE Italy – IT Latvia – LV Lithuania – LT Luxembourg – LU Malta - MT Netherlands – NL Poland – PL Portugal – PT Romania - RO Slovenia – SI Slovakia – SK Spain – ES Sweden – SE United Kingdom - UK
3	Year	Year of the submission of the ingredient information (indicate clearly specified time frame e.g. 01.01.07 – 31.12.07)
4	Product type	The type of the tobacco product. Possible product types are: 1 cigarette 2 cigar 3 fine-cut tobacco 4 pipe tobacco 5 waterpipe tobacco 6 tobacco for oral use 7 other tobacco product (please specify)
5	Brand name	Tobacco product brand name, such as for example: Brand X Platinum, or Brand X Menthol.
6	Brand Features	Tobacco product brand features, including for example the following features: pack style, pack size, tobacco product size, and filter or non-filter product.[3,4]
7	Tar yield	To be provided for cigarettes, and measured according to ISO 3308 and ISO 4387.[5]
8	Nicotine yield	To be provided for cigarettes, and measured according to ISO 3308 and ISO 10315.[5]
9	Carbon monoxide yield	To be provided for cigarettes, and measured according to ISO 3308 and ISO 8454.[5]
10	Product unit weight	Weight of one unit of product[6], including the specified pack moisture and expressed in milligrams.
11	Tobacco weight	Weight of tobacco in one unit of product[6], including the moisture content and expressed in milligrams.
12a	Category	Category of the component or material to which the ingredient is added. The first category given should be “tobacco” and the ingredients should be given for each category by descending order of weight. For cigarettes, these categories are: 1 tobacco (burnt) 2 cigarette paper (burnt) 3 sideseam adhesive (burnt) 4 inks used on cigarette paper (burnt) 5 filtration material (unburnt) 6 filter overwrap (unburnt) 7 filter adhesive (unburnt) 8 tipping paper and tipping paper inks (unburnt)
12b	Category	Category of the component or material to which the ingredient is added. The first category given should be “tobacco” and the ingredients should be given for each category by descending order of weight. For cigars, these categories are: 9 tobacco (burnt) 10 filtration material (unburnt) 11 filter overwrap (unburnt) 12 filter adhesive (unburnt) 13 tipping paper (unburnt) 14 adhesive (unburnt) 15 cigar tips (unburnt)

12c	Category	Category of the component or material to which the ingredient is added. The first category given should be “tobacco” and the ingredients should be given for each category by descending order of weight. For tobacco for oral use, these categories are: 16 Tobacco (unburnt) 17 pouch material
12d	Category	Category of the component or material to which the ingredient is added. The first category given should be “tobacco” and the ingredients should be given for each category by descending order of weight. For fine-cut tobacco, pipe tobacco and water-pipe tobacco, the category is: 18 tobacco (burnt) 19 other (please specify)
13	Ingredient name	Name of ingredient added to the tobacco product. Ingredients should be listed for each category (mentioned in column 12) in descending order of weight, starting with ingredients added to tobacco.
14	Ingredient quantity	Exact quantity of ingredient expressed as the mean, standard deviation and 95% confidence limit of the amount of it in milligrams per one unit of product[7,8,9]
15	Ingredient function	Function of the ingredient. The ingredient functions are given in explanatory list A with their code and definition. The function code as given in list A should be stated here, and if an ingredient has several functions, all the function codes should be stated. Function of the ingredient. The possible ingredient functions are: 1 Addictiveness enhancer (incl. nicotine addictiveness enhancer) 2 Adhesive 3 Binder 4 Carrier 5 Colour 6 Combustion modifier 7 Fibre 8 Filler 9 Filter component 10 Filtration material 11 Flavour 12 Humectant 13 Plasticiser 14 Preservative 15 Processing aid 16 Solvent 17 Sizing agent 18 Smoke enhancer 19 Smoke colour modifier 20 Smoke odour modifier 21 Casing 22 Other
16	Registration number	The Chemical Abstracts Service registry number used to identify the ingredient and is the preferred number to be given here. If no CAS number is available, another appropriate ingredient number should be given such as a FEMA, CoE, or FL number (see Table 3 for explanations for these numbers).
17	Ingredient toxicological data available	Please state “yes” or “no”. If “yes”, please fill in information in Table 2.

Footnotes

3 Indicate here also the identity of other package sizes (containing exactly the same products); the submitted information of all of these products will be the same.

4 Some cigar packages/boxes contain more than one single product (different cigars). This must be noted in this column; information on each of the products must be submitted separately.

5 Add name and address of the laboratory in which the tests was carried out.

6 A unit of product is one cigar, one cigarette, 750mg of fine-cut tobacco, and 1 g of pipe, snuff, water-pipe, snus, or chewing tobacco.

7 A unit of product is one cigar, one cigarette, 750mg of fine-cut tobacco, and 1 g of pipe, snuff, water-pipe, snus, or chewing tobacco.

8 Industry shall inform about the change in the composition, provide the time when was the change introduced and the reasoning for the change.

9 A minimum of 6-8 measurements is recommended to get a reliable mean value.
