Campaigns

Campaigning is one important part of reaching people, improving behaviour and achieving safer, high quality health care practices. For some aspects of infection prevention and control (IPC), campaigning can generate significant social pressure, participation and action. Campaigning can help build collective will, energy and momentum. The problem of health care-associated infection (HAI) can therefore partly be addressed through campaigning. By catalysing and driving the profile of key global campaigns, WHO's IPC Global Unit aims to raise awareness and encourage policy change around priority IPC areas.

70ª Assembleia Mundial de Saúde (WHA) -2017: “Melhorar a prevenção, diagnóstico e gestão clínica da sepsis”

- **Sepsis:** Disfunção de órgãos com risco de vida, secundária à resposta desregulada do hospedeiro à infeção
- Alguns estudos revelam que a sepsis afeta mais de 30 milhões de pessoas em todo o mundo, em cada ano
- A resolução para a sepsis foi adotada durante a WHA de 2017 – estabelecida como prioridade!
- *Prioridades para abordagem da sepsis:*
 - *Reforçar/fortalecer a prevenção* (incluindo os cuidados de saúde)
 - Aumentar a consciencialização dos Profissionais de Saúde para a Sepsis

SEVENTIETH WORLD HEALTH ASSEMBLY WHA70.7

Agenda item 12.2 29 May 2017

Improving the prevention, diagnosis and clinical management of sepsis

The Seventieth World Health Assembly,

Having considered the report on improving the prevention, diagnosis and clinical management of sepsis;¹

Concerned that sepsis continues to cause approximately six million deaths worldwide every year, most of which are preventable;

Recognizing that sepsis as a syndromic response to infection is the final common pathway to death from most infectious diseases worldwide;

Home Publications Countries Programmes Governance About WHO Search

Sepsis

Improving the prevention, diagnosis and clinical management of sepsis

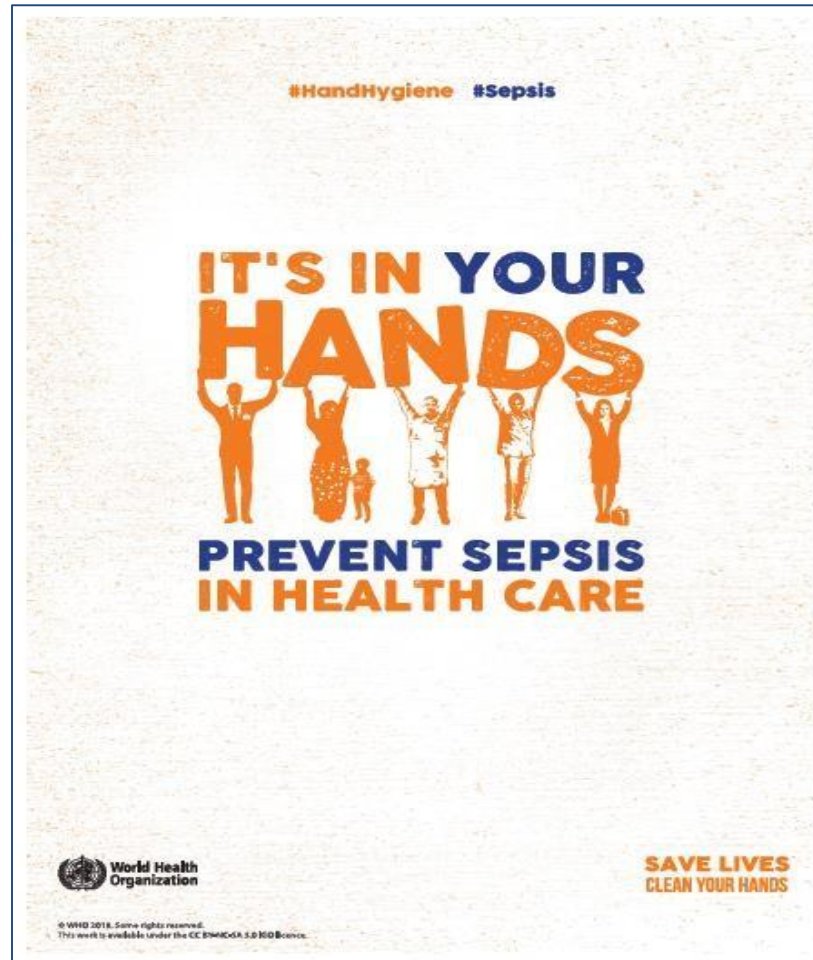

Sepsis arises when the body's response to any infection injures its own tissues and organs. If not recognized early and managed promptly, it can lead to septic shock, multiple organ failure and death. It is a serious complication of infection in all countries and particularly in low- and middle-income countries it represents a major cause of maternal and neonatal morbidity and mortality.

SAVE LIVES: Clean Your Hands 5 May 2018

It's in your hands – prevent sepsis in health care

WHO calls on health facilities to prevent health care-associated sepsis through hand hygiene and infection prevention and control (IPC) action. Sepsis is estimated to affect more than 30 million patients every year worldwide. At the Seventieth World Health Assembly in May 2017, Member States adopted a resolution on improving the prevention, diagnosis and treatment of sepsis.

More information about sepsis

Health care-associated infections, infections acquired during health care delivery, are common and are a risk factor for developing sepsis but we can prevent this. Effective hand hygiene plays a key role. On world hand hygiene day (5 May), the focus for everyone should be on prevention of health care-associated sepsis.

5 May 2018 calls to action

- **Health workers:** "Take 5 Moments to clean your hands to prevent sepsis in health care."
- **IPC leaders:** "Be a champion in promoting hand hygiene to prevent sepsis in health care."
- **Health facility leaders:** "Prevent sepsis in health care, make hand hygiene a quality indicator in your hospital."
- **Ministries of health:** "Implement the 2017 WHA sepsis resolution. Make hand hygiene a national marker of health care quality."
- **Patient advocacy groups:** "Ask for 5 Moments of clean hands to prevent sepsis in health care."

SAVE LIVES: Clean Your Hands – get organized now for 5 May 2018!
‘It’s in your hands – prevent sepsis in health care’

Sepsis is estimated to affect more than 30 million patients every year worldwide. While it often occurs prior to a patient’s access to the health facility, sepsis can also result from care provided in health facilities, particularly, health care-associated infections (HAIs), and also complicate HAIs themselves. That is why WHO asks for your support and action for the upcoming 5 May 2018 global hand hygiene campaign.

SAVE LIVES: Clean Your Hands **WHO's Global Annual Campaign** **Advocacy Toolkit**

“Health care-associated infection is such a big problem, we need to focus the world on something that is truly actionable and can save many, many lives. This action is hand hygiene, a flagship element of WHO's patient safety work.”

Dr Edward Kelley, Director, Service Delivery and Safety, WHO

Annual 5 May Campaign

Não fique de fora do 5 maio – participe!

Como e quando envolver-se?

HOW?

Sign up to the 'SAVE LIVES: Clean Your Hands' campaign if you have not already done so, and ask others to join the campaign as well. More information here:

www.who.int/infection-prevention/campaigns/clean-hands/register/en/.

Plan your activities early (including necessary budget), and confirm commitment from target audiences.

Commit to WHO's campaign theme, look out for regular updates and issue your own information in the months leading up to the campaign.

Use WHO technical/educational materials, including posters that explain the critical times for hand hygiene ("My 5 Moments").

- Use these in training sessions, focus group discussions, morning ward or grand rounds, or as hand-outs to highlight the risks and actions required to ensure patient safety.

Use WHO campaign materials (posters, infographics), and new supporting data as it is issued, to help you engage health workers or key target audiences.

Post campaign information in your own newsletters, intranet and websites, using text from the 'SAVE LIVES: Clean Your Hands' newsletter or WHO campaign slide set, to raise awareness.

Feature the following link – www.who.int/infection-prevention/campaigns/clean-hands/en/ – on your web pages, and WHO will acknowledge your participation by linking to your web pages.

WHEN?

➤ **Any time.** Health facilities can sign up to the WHO campaign any day of the year.

➤ **At the start of each year.** Keep target audiences informed of your activities and key date(s).

➤ **At the start of each year.** Make sure you announce your day (or week) of action, which should be on or around 5 May.

➤ **Routinely.** Use within your routine IPC activities throughout the year.

➤ **Regularly.** Once campaign information is available, it is important to provide updates to engage others.

➤ **April onwards.** Together we can achieve global reach of 5 May messages.

Não fique de fora do 5 maio – participe!

Como e quando envolver-se? (Continuação)

HOW?

Poster placement is critical in getting people's attention in your health facility. Rotating these regularly is key to achieving impact and influence behaviour change.

Show WHO hand hygiene and IPC promotional videos at your events.

Be active on social media with your own strategy to help raise awareness using the official WHO campaign hashtag [**changes annually**].

Follow the World Health Organization on Twitter (@WHO), Facebook, Instagram, and share social media posts relating to 5 May activities with your followers and friends.

Take part in the annual WHO online/virtual education classes and encourage others to attend.

At times, WHO will announce global surveys to understand the burden of HAI and/or hand hygiene improvement progress. Take part in these surveys as another way of getting involved and maintaining the global profile of this important life-saving action.

WHEN?

➤ **Regularly.** Use WHO posters alongside your own. Rotating every 2-4 weeks is recommended.

➤ **Anytime.** Videos are available on the WHO web pages to provide additional support to your local activities, and can be shown at 5th May events.

➤ **5th May.** Don't miss out, help create a buzz and ensure a global impact. Make sure you are part of this amazing global social movement, which helps keep patients and health workers safer every day.

Organizações privadas de Segurança do Doente (POPS) que apoiam a Campanha da OMS para a HM

The screenshot shows the WHO website's 'Infection prevention and control' section. The top navigation bar includes 'Health topics', 'Data', 'Media centre', 'Publications', 'Countries', 'Programmes', 'Governance', and 'About WHO'. The main heading is 'Infection prevention and control'. On the left, a sidebar lists navigation options: 'Home page', 'About us', 'Campaigns', 'Implementation tools and resources', 'Evidence, guidelines and publications', 'Work in countries', and 'News and events'. The main content area features the title 'POPS for Hand Hygiene' and an 'Introduction' section. The introduction text states: 'Every year, WHO asks for support to ensure its global annual campaign SAVE LIVES: Clean Your Hands has an on-going impact. POPS participants provide a lot of energy and innovation to spread the word on the campaign and the WHO 'My 5 Moments for Hand Hygiene', as per WHO recommendations. The range of activities undertaken every 5 May in support of WHO's campaign is to be commended as one part of POPS for hand hygiene activities. The terrific support and drive committed throughout the year is also to be commended.' To the right of the text is a logo for 'Private Organizations for Patient Safety Hand Hygiene' featuring a globe held by two hands. Below the introduction, there is a section 'On this page:' with links to '2016-2017 POPS activity summary' and '2014-2015 POPS activity summary'. A blue banner highlights the '2016-2017 POPS activity summary' section, which begins with the text: 'Over the past year, POPS participants supporting the POPS agreement and the goal of spreading positive messages, have undertaken a number of key activities based on WHO hand hygiene recommendations.' On the right side of the page, there are social media icons (print, email, Facebook, Twitter, Google+, and a plus sign) and a video player titled 'POPS Hand Hygiene - promotional video'. Below the video player, there is a link to 'Reports of POPS meetings' with a sub-link for 'Thirteenth meeting - June 2016'.

POPS for Hand Hygiene

Introduction

Every year, WHO asks for support to ensure its global annual campaign SAVE LIVES: Clean Your Hands has an on-going impact. POPS participants provide a lot of energy and innovation to spread the word on the campaign and the WHO 'My 5 Moments for Hand Hygiene', as per WHO recommendations. The range of activities undertaken every 5 May in support of WHO's campaign is to be commended as one part of POPS for hand hygiene activities. The terrific support and drive committed throughout the year is also to be commended.
